Extract from "Industrial Trends - November 1993"

No recovery in the summer of 1993

Production continues to fall in European industry, and **there is no sign of it bottoming out**. This applies in particular to the capital goods industry.

the **seasonally-adjusted production index** for EUR12 was -0.4% compared with that of the three preceding months, March to May.

The rate of change in the **industrial production index**, adjusted for working days, was 2.3% down for the Community (EUR12) in August 1993 over the corresponding month of the previous year; the figure for July was -4.3%. The corresponding rate of change in August for capital goods was -5.5%.

If one takes the figures for the last three available months, June to August 1993, the rate of change in

The recession is even more pronounced in Japan, where the corresponding rate of change is -0.7% (estimated). Nor is there any noticeable upswing in the USA, where the figure is +0.5%.

At **Member State** level, the rates of change for the last three months compared with the previous months are as follows for the seasonally-adjusted industrial production index: Denmark +4.6%, Greece +1.5%, Spain +1.6%, United Kingdom +1.1%, Netherlands 0.0%, Germany -0.3%, France -0.6%, Italy -1.2%, Ireland -2.3% (estimated), Belgium -3.6% (estimated). Production thus fell or remained at a low level with slight positive rates of change in many Member States in the summer.

Industrial production fell particularly in the **following sectors** of EC industry: the production of metals [NACE 22], the manufacture of metal articles [NACE 31], the **motor vehicle industry** [NACE 35] and the textile industry [NACE 43].

Verarb. Gewerbe - Trendwachstum Monat zu Monat

Manufacturing - Monthly Change in Trend

Ind. manufacturières - var. mens. de la tendance

Saisonbereinigte Reihen enthalten irreguläre Effekte und Ausreißer, die die langfristige Konjunkturentwicklung überdecken. Der langfristige Trend dagegen zeigt allein die Richtung der konjunkturellen Entwicklung. Er wird durch mehrmalige Anwendung gleitender Durchschnitte berechnet, wodurch die irregulären Effekte eliminiert werden. Am aktuellen Rand können allerdings Fehlinterpretationen nicht ausgeschlossen werden, da hier die gleitenden Durchschnitte geschätzt werden müssen.

Seasonally adjusted series still contain irregularities and outliers which mask longer-term trends. Only the long-term trend, however, is an adequate indicator of economic evolution. It is calculated with the aid of repeatedly computing moving averages, thus eliminating the irregularities. As regards the latest figures, however, false interpretations cannot be ruled out, since here the moving averages have to be estimated.

Des séries corrigées des variations saisonnières contiennent toujours des effets irréguliers et des valeurs aberrantes qui masquent l'évolution conjoncturelle à long terme. En revanche, la tendance à long terme ne montre que l'orientation de l'évolution conjoncturelle. La tendance est déterminée à l'aide de calculs répétés de moyennes mobiles, qui permettent d'éliminer les effets irréguliers. Néanmoins, il n'est pas exclu que les toutes dernières valeurs donnent lieu à des erreurs d'interprétation car ici les moyennes mobiles doivent être estimées.

Produktionsindex: 12 Monate / 12 vorherige Monate
Production Index: 12 months / previous 12 months
Indice de production: 12 mois / 12 mois précédents
