Introduction

The annual catalogue of publications of the European Communities is divided into two parts.

Part A comprises the monographs and series published by the Institutions of the European Communities as well as the yearly periodicals.

Part B comprises the bibliographic notices of the **COM Documents**, **EP Reports** and **ESC Opinions** published during the year on paper and microfiche, by the Institutions of the European Communities.

This makes it easier for users to follow the progress of a COM document, since the ESC Opinions and EP Reports usually refer to a COM document. This catalogue contains all the publications for these English-language documents, supplied on paper and microfiche. The catalogue is also available in the other official languages of the European Communities.

Format

The catalogue is divided into three parts.

Part I – The classified index provides a classification by subject, of the titles, under 19 headings (see 'List of Headings' on page 8). This list is largely based on that used for the '*Directory of Community legislation in force*'.

Each complete entry is preceded by a sequence number, which appears only once for each document title. The title of a document, however, may sometimes appear under more than one heading by virtue of the subject matter, and in this case the sequence number is given on the right-hand side of these secondary entries but there is no bibliographic reference (see detailed explanation on page 7).

Part II – The alphabetical index comprises all the keywords or key expressions appearing in the document. The list, compiled using the EUROVOC thesaurus (multilingual list of Community terminology),

is based mainly on analysis and subsequent redefinition of the document using keywords or key expressions contained in the EUROVOC thesaurus. This thesaurus will be supplied to subscribers or users on request.

The index contains from one to five keywords for each document, set out in alphabetical order with as many permutations as there are keywords. This makes for easier searches. The keywords are followed by a reference number. This number refers to the sequence number in the catalogue (see detailed explanation on page 7).

Part III – The numerical index comprises all the documents in ascending numerical order, with the corresponding microfiche number.

Subscription system

An attractive system of selective subscriptions is on offer for each of the three series of documents (COM documents, ESC Opinions (CES) and EP Reports (PE DOC)). A selective/combined subscription covering the three series of documents can also be taken out at favourable rates.

This system of selective/combined subscriptions, available on paper only, allows subscriptions by people who have so far done without this important source of information because of the cost.

Microfiche subscriptions are still only possible for each entire series, but attractive rates are available for those interested in all three series.

More information can be obtained from the sales offices, whose addresses are given on the third page of the cover.

Note: Public documents are indexed in part A of the catalogue: 'Publications'.
