COMMISSION OIL BULLETIN NO. 221

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

COMMISSION OIL BULLETIN NO. 224

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

Weekly summary :

Evolution (in %) of Community indications for :

1 ^o) Weighted average pre-tax prices for principal oil products at 12.12.83 (Table 2)	
compared with 15.12.1978	+63%
compared with previous week	-1,12%
2 ^o) Weighted average CIF cost of crude oil supplies for August 1983 (Table 3)	
compared with 15.12.1978	+113,80%

(1) The CIF supply cost is derived from monthly declarations by Member States (see Oil Bulletin 207 for methodology).

COMMISSION OIL BULLETIN NO. 227

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

Weekly summary :

Evolution (in %) of Community indications for :

- | | |
|---|-----------------|
| 1 ^o) Weighted average pre-tax prices for principal oil products at 9.1.84 (Table 2) | |
| compared with 15.12.1978 | <u>+59,50%</u> |
| compared with previous week | <u>-2,80%</u> |
| 2 ^o) Weighted average CIF cost of crude oil supplies for September 1983 (Table 3) | |
| compared with 15.12.1978 | <u>+112,20%</u> |
- (1) The CIF supply cost is derived from monthly declarations by Member States (see Oil Bulletin 207 for methodology).

COMMISSION OIL BULLETIN NO.230

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

Weekly summary :

Evolution (in %) of Community indications for :

1^o) Weighted average pre-tax prices
 for principal oil products at 30.1.1984 (Table 2)

compared with 15.12.1978

+64%

compared with previous week

-

2^o) Weighted average CIF cost of crude
 oil supplies for September '83 (Table 3)

compared with 15.12.1978

+112,20%

(1) The CIF supply cost is derived from monthly declarations by Member States (see Oil Bulletin 207 for methodology).

COMMISSION OIL BULLETIN NO. 231

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

Weekly summary :

Evolution (in %) of Community indications for :

1^o) Weighted average pre-tax prices
for principal oil products at 6.2.1984 (Table 2)

compared with 15.12.1978

+68%

compared with previous week

+2,30%

2^o) Weighted average CIF cost of crude
oil supplies for October 1983 (Table 3)

compared with 15.12.1978

+113,80%

(1) The CIF supply cost is derived from monthly declarations by Member States (see Oil Bulletin 207 for methodology).

COMMISSION OIL BULLETIN NO. 232

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

COMMISSION OIL BULLETIN NO.235

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

Weekly summary :

Evolution (in %) of Community indications for :

1 ^o) Weighted average pre-tax prices for principal oil products at 5.3.1984 (Table 2)	
compared with 15.12.1978	+76%
compared with previous week	+1,50%
2 ^o) Weighted average CIF cost of crude oil supplies for November 1983 (Table 3)	
compared with 15.12.1978	+113,30%

(1) The CIF supply cost is derived from monthly declarations by Member States (see Oil Bulletin 207 for methodology).

Niveaux indicatifs hebdomadaires des prix hors taxes à la consommation en monnaies nationales

COMMISSION OIL BULLETIN NO. 238

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

COMMISSION OIL BULLETIN NO. 239

4417.4/1

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

Weekly summary :

Evolution (in %) of Community indications for :

1 ^o) Weighted average pre-tax prices for principal oil products at 2.4.1984 (Table 2)	
compared with 15.12.1978	+75%
compared with previous week	+1,30%
2 ^o) Weighted average CIF cost of crude oil supplies for December 1983 (Table 3)	
compared with 15.12.1978	+112,10%

(1) The CIF supply cost is derived from monthly declarations by Member States (see Oil Bulletin 207 for methodology).
