ISEC/1/89

PRESS RELEASE

UK RECEIVES £82,730,000 FROM EUROPEAN REGIONAL DEVELOPMENT FUND

EMBARGO: NOT FOR PUBLICATION BEFORE 13:00 GMT  
TUESDAY, 10TH JANUARY 1989

The Commission of the European Communities has approved grants from the European Regional Development Fund (ERDF) amounting to £82,73m in respect of 350 investments in infrastructure and industry in the United Kingdom. This is the tenth allocation from the 1988 Community Budget.

In the West Midlands a total of 62 investments have received Fund assistance totalling £9.41m. The 35 investments in manufacturing industries throughout the region will create more than 1,500 new jobs. Of particular interest amongst the infrastructure grants is one of £78,000 to Coventry Cathedral and another of £1m to Lichfield Cathedral for improvement works which will enhance their appeal as tourist venues.

Twenty-two projects have been assisted in the Yorkshire and Humberside region to the tune of £12.96m. Grants have been made towards various road and sewer improvements and industrial estate developments all of which will aid the growth of industries throughout the region. A grant of £1.6m has also been made to Scarborough Borough Council towards the construction of a coast protection system to protect tourism infrastructures at Whitby.

The East Midlands region has received 6 grants totalling £1.25m. Of this, over £800,000 will help towards the establishment of the Hinckley Fields Industrial Estate at Hinckley, which is expected to create 1,425 new jobs.

The South West of England has been allocated a total of £4.69m covering 19 separate investments in both industry and infrastructure. Of special note are the grants in support of infrastructure for the region's all-important tourism industry, including £1.3m for the creation of the Hoe Visitor Centre at Plymouth. A grant of over £900,000 has also been awarded to the construction of the Mabe By-Pass, which is intended eventually to become part of the principal access route to Falmouth.

In the North region grants totalling £28.91m have been awarded to 17 projects. The single largest grant of £19.46m has been made in respect of a further stage in the electrification of the East Coast Main Line railway where it passes through the region. By providing considerable improvements in the railway service this scheme will add to the region's potential for industrial development. Grants totalling £2.81m have been awarded towards improvements in the region's highway infrastructure and a total of £337,000 has been granted for the provision of basic infrastructure and units on two new industrial estates situated at the sites of the former Hordern Colliery in Easington and Boldon Colliery in South Tyneside.

Awards to 11 industrial investments totalled £1.95m and will help to create 773 jobs whilst maintaining a further 194 jobs in the region.

Of the total grants of £6.68m awarded in the North West the largest slice relates to industrial investments in the area which have been granted some £4.2m and are aimed at creating a total of 1,068 new jobs and maintaining a further 337. Grants to infrastructure have included £178,150 towards the provision of 60 small workshop units as phase II of the Chester Business Generation Centre creating over 130 jobs and £95,000 to Sefton MBC to assist in the construction of the Southport Stellarium and Space Theatre. This will provide a unique tourist facility which will attract some 75,000 visitors per annum.

Scotland received a total grant of £14.49m in favour of 62 projects. One of these was investment in industry, which is expected to create 55 jobs for the grant of £284,000. Sixty-one investments in infrastructure received a total of £14.21m. The major part of these was for the construction of basic infrastructures such as roads and bridges, but also two harbours and a visitor centre will receive aid from ERDF.

In Northern Ireland 67 investment projects received a total of £7.64m. Forty of these, within industry, received a total of £2.89m and as a result of these investments 742 jobs are expected to be created and another 293 maintained. Twenty-seven infrastructure investments received a total of £4.75m in aid from ERDF. Most of these were investments improving the road and water supply systems.
