## Foreword

### 1. Introduction

The monthly bulletin on external trade, published by Eurostat in the B series, Short-term trends, sets out to provide within the shortest possible deadlines data on short-term trends in the European Union's external trade. In particular, it contains data on the European Union's trade flows with its trading partners and the various economic areas and a breakdown of this data by major product group. The bulletin also provides an overview, based on data from various international sources, of the place occupied by the European Union in the external trade of its main trading partners and of third countries. Trade flows between Member States are recorded under the Intrastat system and will be published at a later date.

The European Union's external trade statistics at the most detailed classification level are published monthly on CD-ROM (B series: Intra and extra-EU trade).

Trends in external trade since 1958 and a comparison with world trade are contained in the publication "*External Trade Statistical Yearbook (Series A)*".

External trade statistics are also available on line via the Eurostat data banks (Comext).

The catalogue of Eurostat publications and a detailed methodological description can be found in "*External Trade Statistics User's Guide*" published in all languages of the European Union .

### 2. Sources

Since 1978, the Member States have transmitted European Union external trade statistics according to a uniform methodology laid down by Council Regulation (EEC) No 1736/75. This regulation was amended to take account of the new developments in 1988, i.e. the introduction of the new external trade classification entitled "Combined Nomenclature" (CN) and the new "Single Administrative Document".

The tables in this bulletin are compiled by Eurostat from the detailed data transmitted on magnetic tape by the Member States; these data are broken down according to the eight-digit subheadings of the Combined Nomenclature.

Eurostat wishes to take this opportunity of thanking the relevant departments in the Member States for their cooperation, which enables it to compile these harmonized European Union statistics and to ensure their quality.

### 3. Coverage

The results of the European Union statistics relate to special trade. This comprises:

- 1) imports of goods placed in free circulation on their arrival at or on leaving warehouses, imports for inward processing and imports after outward processing (customs procedures);
- 2) exports of European Union goods, exports after inward processing and exports for outward processing (customs procedures).

Transit and warehousing traffic are not covered by European Union statistics.

### 4. Statistical territory

The statistical territory of the European Union comprises the customs territory of the European Union excluding the French overseas departments. Thus Greenland, the Canary Islands and Ceuta and Melilla are not covered, while the Azores and Madeira for Portugal and the Balearics for Spain are.

From October 1990, the external trade data of the Federal Republic of Germany, the other Member States and EUR 12 relate to the Federal Republic of Germany in its borders after 3 October 1990.

## 5. *Goods classification*

In this publication the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 3 since 1988) by means of correspondence tables drawn up by Eurostat on the basis of the Combined Nomenclature (CN).

## 6. *Trading partners: countries and economic areas*

The results of the European Union are broken down by country of origin, country of consignment and country of destination in accordance with the "Country nomenclature for statistics on European Union external trade and trade between its Member States", referred to as the Geonomenclature (Geonom).

When goods that originate in third countries and are not in free circulation in the European Union are imported, EU statistics state the country of origin. When such goods are exported, the country of destination is specified.

## 7. *Units*

### *Values*

The statistical value of goods on import is equal to the customs valuation or to a value determined by reference to the concept of customs valuation (in the case, for example, of imports from other Member States). It is the CIF value (cost, insurance, and freight).

The statistical value of goods on export is equal to their value at the place and time at which they leave the statistical territory of the exporting Member State. It is the FOB value (free on board).

The value is expressed in European units of account (ecus). The ecu is a "basket" currency unit based on the market exchange rates of a certain quantity of each European Union currency according to a weighting system involving the five-year average of each Member State's gross national product and intra-EU trade balance. The rates used in this bulletin are averages of daily rates. The bulletin contains a table showing the conversion rates used.

### *Quantity*

The statistics give the net weight of the goods.

## 8. *Confidentiality*

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The relevant legislation, the procedures for implementing it and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data; it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only or to exports only and to only some of the variables recorded (value, statistical procedure, quantities, country, partner, etc.).

Measures are taken during collection and during processing by Eurostat to minimise the effect of these headings on the results for the European Union as a whole; in particular, trade data on these headings are included at higher levels of aggregation and in the totals.

On the other hand, the statistics are supplied on the strength of customs documents and do not take account of any amendments made by some Member States at the end of the year in drawing up accounts on intergovernmental trade. In view of this, drawing up a trade balance may produce figures that vary sometimes considerably from the official national figures.

## 9. *Corrections*

Every month the Member States send Eurostat a magnetic tape containing the results for the current month.

In order to correct these results, the Member States also send every month a magnetic tape containing monthly corrections covering the previous 24-month period.

## Indices

### 1. Introduction

Changes over time in the value of trade are influenced by variations in prices and the quantities marketed. Indices are used to measure these two effects. In general, a system of indices is chosen so that the product of the volume index and the price index expresses the value index. Several systems of indices meeting this requirement may be regularly used. The results obtained by using one system will generally be different from those obtained by using another. For various reasons the Member States do not use a common system, and the level of breakdown of their indices by product group and by partner area also varies. Eurostat has therefore devised its own external trade indices which enable it to calculate, for each Member State, European Union indices on a strictly comparable basis. These indices may be consulted on the Trend database developed by Eurostat.

### 2. Sources of data

There are basically two ways of obtaining information on prices: conducting price surveys by directly approaching importers and exporters and using data collected by the customs authorities. At present only customs data are available in all the Member States. Eurostat therefore calculates indices of unit values (values divided by quantities) and uses them as price variation indicators. The computing programs contain a system for automatically identifying extreme unit values pointing to unlikely price movements.

### 3. Extreme values

To avoid a number of restrictions involved in using customs data, Eurostat decided to adopt two basic principles in calculating unit value indices: using the most detailed data possible and always bearing in mind that the object of the exercise is to break down variations in value into a "price" component and a "volume" component. Two rules are applied in order to exclude unlikely price movements. The first is that, given the general level of inflation, the price of a product should not be very different from its level a year ago. Any variation of five or more points is regarded as suspect. The second – more restrictive – rule is that the variation in the price of a product in relation to the most recent month for which data are available should not be very different from the average price variation for similar products. Applying these rules prevents extreme variations due to factors that are unconnected with prices and would otherwise distort the unit value index. For products whose unit values are rejected, the variations are taken to be the same as those for similar products.

### 4. Classification used

The United Nations Standard International Trade Classification (SITC), revised for the third time in 1988, was drawn up on the basis of the Harmonized Commodity Description and Coding System (HS). Using tables of correspondence between the various classifications (Nimexe, Combined Nomenclature and SITC), Eurostat has been able to publish an uninterrupted time series of external trade indices from 1979 to the present.

From 1994 onwards, external trade publications will give indices calculated from 1989 on the basis of the following SITC Rev. 3 aggregates:

TOTAL: all commodities;  
0+1: foods, beverages and tobacco;  
2+4: crude materials, except fuels;  
3: fuels  
5+6+7+8: manufactured goods.

By compiling other correspondence tables, Eurostat is able to supply complete time series based on other classifications.

## 5. *Types of indices and rebasing*

Eurostat calculates Fisher's "ideal" annual chain indices. Since the "basket of goods" marketed at international level varies rapidly over time, the annual chain permits the updating of the index weightings. Each month the changes in unit values in the product groups at detailed level are weighted in order to obtain the changes in unit values in the various major product categories. Since these changes are based on the previous year, a chain of unit values is obtained. The corresponding volume index chain is the ratio of the unit value variation to the variation in value for the month in question compared with the monthly average for the previous year. The indices published each month are calculated by multiplying the above-mentioned chains by the annual indices for the previous year, a fixed reference period having been chosen (at present 1990). The annual unit value chains are obtained by weighting the monthly chains by the volumes, while the annual volume chains are calculated by dividing the annual value variations by the unit value chains.

## 6. *General comments*

- Only data on normal trade (statistical procedure 1) are used to calculate the unit value indices; however, data on total trade (covering all the statistical procedures) are used to calculate the value indices from which the volume indices are obtained.
- The unit value indices are calculated on the basis of values expressed in ecus.
- For any further information on the methods used to calculate the indices, please refer to Eurostat's specialised publications.

## Trends in European Union trade

## SEASONAL ADJUSTMENTS: RESULTS

After fairly steady improvement from the start of 1993 the seasonally-adjusted figures for the European Union's exports to the rest of the world have been relatively stable since May 1994. The rise in October (+0.4%) was only slight and just made it possible to regain the level reached in August. Exports have performed well since the start of 1994, with an average growth of +12.9% compared with 1993.

The seasonally-adjusted figures for the European Union's imports from the rest of the world have been rising again since the

middle of 1994. This growth (+1.7% in October) follows a brief period of stability going back to January 1994. In relation to the same period of the previous year, the growth rate for imports in the first ten months of the year nevertheless reached +9.3%.

Thanks to a strong export performance, the European Union's seasonally-adjusted trade balance continued to improve in 1994. There was a surplus of ECU 4.6 billion in the first ten months of the year, notwithstanding a slight deficit of ECU 0.1 billion in October.

(1) Seasonal Adjustment via X11/ARIMA procedure.

## GLOBAL TRENDS IN EXTERNAL TRADE

### EUROPEAN UNION EXTERNAL TRADE : Results until October 1994.

European Union's exports increased more than imports during the first ten months of 1994 (+1.5 percentage points). In the same period, the United States' and Japan's imports showed a rate of change larger than exports by 3.6 and 3.2 points respectively.

In October 1994 the *European Union's* external trade recorded a surplus of ECU 1.4 billion compared to the ECU 3 billion registered in the same month in 1993. Nevertheless, the cumulated deficit for January-October 1994 narrowed to ECU 1.1 billion from ECU 6.5 registered a year earlier.

During the first ten months of 1994, the extra-EU exports increased more than imports: respectively 11.5% and 10%. This positive gap was the main reason for the trade balance recovery even if it has narrowed compared to the same period in 1993.

From January to October 1994 the *United States'* trade deficit recorded an ECU 24.7 billion increase compared to the corresponding period a year earlier, reaching ECU 123.7 billion (US dollars 147.1 billion).

In ECU terms, the imports' rate of change between the first ten months of 1993 and 1994 was larger than that of exports (13.2% against 9.6%); if measured in US dollars these figures were almost identical: respectively 13.4% and 9.5%.

In fact the US dollar, after the appreciation registered in the first half of 1994, came back to the same level recorded in October 1993.

In the first ten months of 1994, the *Japanese* trade surplus improved compared to the same period in 1993 by ECU 1.2 billion totalling ECU 85 billion.

In ECU terms, the rates of change of exports and imports were both positive: respectively 8% and 11.2%; while if measured in the Japanese currency, the two flows registered negative rates of growth (-0.1% and -1.3%).

1 billion = 10<sup>9</sup>

## GLOBAL TRENDS IN EXTERNAL TRADE

### EXTERNAL TRADE BY MEMBER STATES: Results until October 1994.

**In the first ten months of 1994, Germany and Italy showed the two largest extra-EU surpluses among the EU countries, while the United Kingdom and the Netherlands registered the most important deficits. As for the imports and exports flows, the most dynamic growth rates were showed by the BLEU and the Ireland.**

In the period January-October 1994, **Germany** registered both the largest extra-EU surplus among the EU member states (ECU 20.3 billion) and the most important improvement compared to the same period a year earlier (ECU 6.3 billion). German exports showed a 12.2% increase compared to the corresponding period of 1993, while imports grew by 8.4%.

During the first ten months of 1994, the **Italian** exports increased faster than imports compared to the same period a year earlier, the growth rate being respectively 11.9% and 8.1%.

The Italian trade balance improved its surplus by ECU 2.6 billion, reaching ECU 10.1 billion from ECU 7.5 billion recorded in 1993.

In the period January-October 1994, the **United Kingdom** was the EU country that experienced the largest trade deficit which reached ECU 17.6 billion.

The UK's trade position showed a slight deterioration (ECU 0.7 billion) with reference to the same period of 1993, even if the gap between the exports' and imports' growth rates was positive (+0.8 percentage points).

The Dutch extra-EU deficit recorded the most important deterioration between January-October 1993 and 1994 (ECU 4.9 billion) reaching ECU 15.6 billion.

As a matter of fact the **Netherlands'** extra-EU imports - which include goods entering the Union via Dutch harbours and then delivered to other member states - grew very quickly in the first ten months of 1994 (+21.3%), while the exports' rate of change was slightly under the EU average (10.6%).

During the period January to October 1994 the **BLEU's** and **Ireland's** extra-EU trade recorded the largest rates of growth among the EU member states compared to the same period a year earlier.

As for imports, these percentages were respectively 23.1% and 21.3%, while on the exports side, both countries registered lower values (21.3% and 16.3% respectively). In the first ten months of 1994, the external position of these two member states worsened if compared to the same period in 1993. The BLEU's deficit went up to ECU 0.9 billion from ECU 0.4 billion, while the Irish surplus was slightly reduced.

**France's** extra-EU trade surplus improved by ECU 1.4 billion between the above mentioned period in 1994 and a year earlier (from ECU 6.7 billion to ECU 8.1 billion).

The rates of change of both imports and exports were well under the EU average: respectively 6.7% and 8.3%.

Between the periods January-October 1993 and 1994, the external trade positions of **Denmark** and **Portugal** were almost stable (respectively ECU 2 billion surplus and ECU 2.3 billion deficit).

While the Danish imports and export were both quite dynamic (showing a rate of growth of respectively 15.3% and 12.8%), the Portuguese registered rates of change below the EU average (6.2% and 8.8%).

From January to October 1994 **Spain** and **Greece** improved their trade balances compared to the corresponding period a year earlier: both countries reduced their extra-EU deficits respectively by ECU 0.2 billion and ECU 1.1 billion.

Among the EU countries Greece was the only which experienced a negative rate of growth of its imports (-11.8% compared to the previous year) while exports went up by 15.7%.

As far as Spain is concerned, these percentage changes were respectively 9.3% and 12.8%.

## EUROPEAN UNION EXTERNAL TRADE BY PARTNER COUNTRY

### TRADE IN TERMS OF VALUE: Results until October 1994.

**In the first ten months of 1994, both the EU trade balances with industrialized countries and with developing countries showed an improvement compared to the same period a year earlier (ECU 6.4 billion and ECU 0.5 billion respectively). At the same time, the EU trade positions with CEEC's and with China worsened by ECU 1.4 billion and ECU 1.5 billion respectively.**

During the period January-October 1994 the EU trade flows with industrialized countries recorded an ECU 10.8 billion deficit compared to ECU 17.2 billion shown in the same period of 1993.

The trade surplus with the United States and Canada went up to ECU 2.8 billion from ECU 0.2 billion recorded a year earlier, while the consistently high deficit with Japan dropped by ECU 2.8 billion. The trade deficit with the EFTA countries increased from ECU 2 billion to ECU 2.3 billion.

The trade surplus with *developing countries* went up to ECU 17.5 billion from ECU 17 billion between the periods January-October 1993 and 1994. While the EU registered surpluses with the Mediterranean Countries (ECU 9.6 billion), the Asian Newly Industrialized Countries (ECU 6.1 billion) and Latin America (ECU 0.7 billion), the extra-EU trade balance showed an ECU 3.2 billion deficit with the ACP and an ECU 3.7 billion deficit with the OPEC countries.

In October 1994, the EU's trade with the *Central and Eastern European countries* recorded an ECU 0.1 billion deficit which led the cumulated balance for the 1994's first ten months to an ECU 0.3 billion deficit (against an ECU 1.1 billion surplus registered a year earlier).

In the period January-October 1994, the deficit with *China* also went up to ECU 8.6 billion from ECU 7.1 billion registered in the same period of 1993.

During the first ten months of 1994, EU *imports* from the industrialized countries showed a 8.6% increase compared to the same period a year earlier. While imports from the United States and Canada and from EFTA recorded an increase above the EU average (10.8% and 11.5% respectively) the EU imports from Japan only rose by 1.3% only.

The EU imports from developing countries increased by 10% between the periods January-October 1993 and 1994.

The values of imports from ACP and Latin America countries recorded the most dynamic rates of change (24.5% and 22.4% respectively), while the flows from Asian Newly Industrialized (5.7%) and Mediterranean countries (8.4%) showed less significant performances. EU imports from OPEC countries registered a 1% decrease mainly due to the fall in international oil prices. As a matter of fact, in the first ten months of 1994, the ECU cost of the EU's crude oil supplies went down by 7.2% (7.1% if measured in US dollar) compared to the same period a year earlier.

The EU imports from Central and Eastern European countries as well as from China, continued the fast-growing trend showed in the previous two years: the percentage changes in the period January-October against a year earlier were 22.1% and 16.3% respectively.

In the period January-October 1994, *exports* from the EU to the industrialized countries went up by 12.4% compared to the same period of 1993. This result is mainly due to the good performance of EU exports to the United States and Canada (14.1%) and to Japan (18.3%), while sales in the EFTA markets registered a rate of growth close to the average (11.4%).

The global value of the exports to the developing countries showed a more moderate increase (9.1%): while exports to both the Asian NICs and to the Latin American countries showed the same dynamic rate of growth (20.1%), the EU exports to the Mediterranean countries grew by only 4.3% and the sales to OPEC and ACP countries went down by 9.6% and 12.9% respectively.

The EU export flows to Central and Eastern European countries recorded a percentage change in the first ten months of 1994 well over the EU average (17.1%), while the exports to China, after the boom experienced in 1993, were still growing although at a more moderate rate (13.1%).

## EUROPEAN UNION EXTERNAL TRADE BY PRODUCT

### TRADE IN TERMS OF VALUE: Results until October 1994.

**During the first ten months of 1994, EU trade in machinery and transport equipment recorded the largest surplus (ECU 50.8 billion), while fuel products showed the most important deficit (ECU 40.4 billion).**

In the first ten months of 1994 the **primary products' (SITC 0-4)** deficit went up to ECU 64.9 billion, compared to the ECU 57.5 registered in the corresponding period in 1993.

The EU trade deficit in **fuel products (SITC 3)** grew slightly by ECU 0.4 billion, while the balances for **food, beverages and tobacco (SITC 0+1)** and **raw materials except fuel (SITC 2+4)** showed more evident deteriorations during the first ten months of 1994, compared to the same period a year earlier: respectively ECU 1.8 billion and ECU 5.2 billion,.

As far as the **manufactured products (SITC 5-8)** are concerned, EU external trade showed a surplus of ECU 69.3 billion compared to the ECU 58.1 billion registered in the corresponding period in 1993.

The EU surplus in **machinery and transport equipment (SITC 7)** increased by ECU 8 billion, reaching ECU 50.8 billion. The **chemical products (SITC 5)** also saw their surplus enhanced to ECU 26.3 billion (compared to ECU 24 billion registered one year earlier), while the deficit for **other manufactured goods (SITC 6+8)** went down to ECU 7.8 billion from ECU 8.7 billion registered in 1993.

As for the **import** flows, the raw materials except fuel (SITC 2+4) were the sections that recorded both the highest

growth rate compared to the month of October 1993 (+34.6%) and the most dynamic performance between the periods January-October 1993 and 1994 (+24.2%).

In the first ten months of 1994, chemical products (SITC 5) and food, beverages and tobacco (SITC 0+1) registered a rate of change of 16% and 13.8% respectively; while imports of machinery and transport equipment (SITC 7), and of other manufactured goods (SITC 6+8) showed an increase just above the average: respectively 10.7% and 10.8% compared to the same period a year earlier.

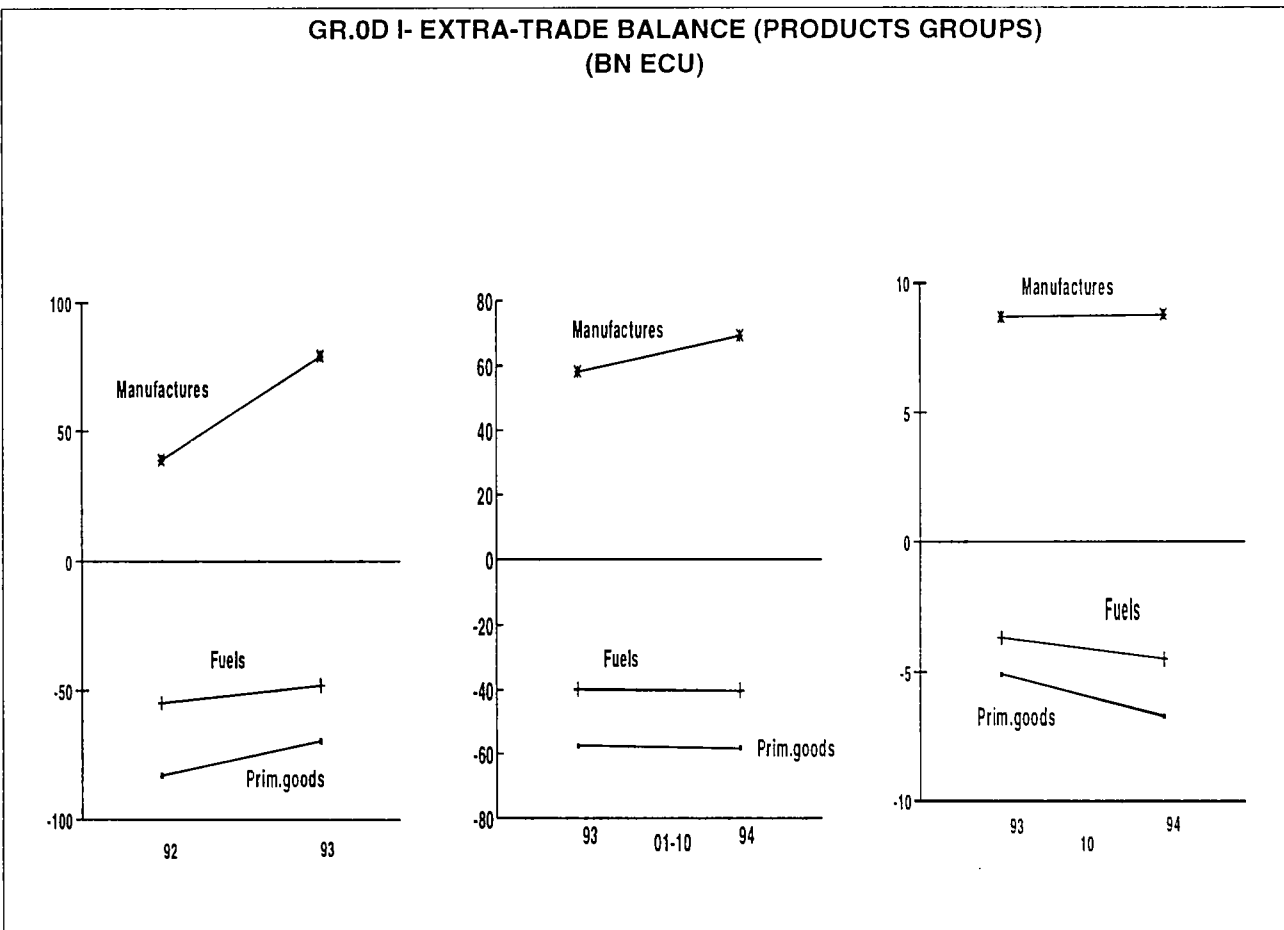

The reduction in international oil price is the main reason for the 1.5% drop in the fuel products' (SITC 3) imports between the first ten months of 1993 and 1994.

Between the first ten months of 1993 and 1994, the **exports** of manufactured products aggregated by main SITC sections showed rates of change above the average.

These rates were +13.1% for the chemical products (SITC 5), +12.8% for the machinery and transport equipment (SITC 7), while the other manufactured goods (SITC 6+8) recorded a 12.4% increase.

As far the primary products are concerned in the same period, the exports of raw materials other than fuel (SITC 2+4) went up of 12.9%, while food, beverages and tobacco (SITC 0+1) and fuel products (SITC 3) registered relatively weak performances: respectively +7.9% and -8.9%.

(1) The ECU is a 'basket' monetary unit based on the market exchange rates of certain quantity of each European Union currency weighted on the basis of the average gross national product over five years and of the intra-EU trade of each Member State. The rates used here are averages of the daily rates.

**List of products : SITC, rev. 3**

0-9 Total trade

## **0 Food and live animals**

- 00 Live animals other than animals of division 03
- 01 Meat and meat preparations
- 02 Dairy products and birds' eggs
- 03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof
- 04 Cereals and cereal preparations
- 05 Vegetables and fruit
- 06 Sugars, sugar preparations and honey
- 07 Coffee, tea, cocoa, spices, and manufactures thereof
- 08 Feeding stuff for animals (not including unmilled cereals)
- 09 Miscellaneous edible products and preparations

### **1 Beverages and tobacco**

- 11 Beverages
- 12 Tobacco and tobacco manufactures

### **2 Crude materials, inedible, except fuels**

- 21 Hides, skins and fur skins, raw
- 22 Oil seeds and oleaginous fruits
- 23 Crude rubber (including synthetic and reclaimed)
- 24 Cork and wood
- 25 Pulp and waste paper
- 26 Textile fibres (other than wool tops and other combed wool), and their wastes (not manufactured into yarn or fabric)
- 27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
- 28 Metalliferous ores and metal scrap
- 29 Crude animal and vegetable materials, n.e.s.

### **3 Mineral fuels, lubricants and related materials**

- 32 Coal, coke and briquettes
- 33 Petroleum, petroleum products and related materials
- 34 Gas, natural and manufactured
- 35 Electric current

### **4 Animal and vegetable oils, fats and waxes**

- 41 Animal oils and fats
- 42 Fixed vegetable fats and oils, crude, refined or fractionated
- 43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s

## **5 Chemicals and related products, n.e.s**

- 51 Organic chemicals
- 52 Inorganic chemicals
- 53 Dyeing, tanning and colouring materials
- 54 Medical and pharmaceutical products
- 55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 Fertilizers (other than those of group 272)
- 57 Plastics in primary forms
- 58 Plastics in non-primary forms
- 59 Chemical materials and products, n.e.s

## **6 Manufactured goods classified chiefly by material**

- 60 Complete industrial plant appropriate to section 6
- 61 Leather, leather manufacture, n.e.s, and dressed fur skins
- 62 Rubber manufacture, n.e.s
- 63 Cork and wood manufacture (excluding furniture)
- 64 Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 65 Textile yarn, fabrics, made-up articles, n.e.s, and related products
- 66 Non-metallic mineral manufactures, n.e.s
- 67 Iron and steel
- 68 Non-ferrous metals
- 69 Manufacture of metals, n.e.s

## **7 Machinery and transport equipment**

- 70 Complete industrial plant appropriate to section 7
- 71 Power-generating machinery and equipment
- 72 Machinery specialized for particular industries
- 73 Metal working machinery
- 74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s
- 75 Office machines and automatic data-processing machines
- 76 Telecommunications and sound recording and reproducing apparatus and equipment
- 77 Electrical machinery, apparatus and appliances, n.e.s and electrical parts thereof (including non-electrical counterparts n.e.s of electrical household type equipment)
- 78 Road vehicles (including air-cushion vehicles)
- 79 Other transport equipment

## **8 Miscellaneous manufactured articles**

- 80 Complete industrial plant appropriate to section 8
- 81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s
- 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 Travel goods, handbags and similar containers
- 84 Articles of apparel and clothing accessories
- 85 Footwear
- 87 Professional, scientific and controlling instruments and apparatus, n.e.s

- 88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks
- 89 Miscellaneous manufactured articles, n.e.s

## **9 Commodities and transactions not classified elsewhere in SITC**

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 94 Complete industrial plant, not elsewhere specified
- 96 Coin (other than gold coin) not being legal tender
- 97 Gold, non-monetary (excluding gold, ores and concentrates)

## **Geonomenclature 1994**

## **Economic zones 1994**

## ECONOMIC ZONES 1994

*Table I*

In table 1 the economic zones of the same level do not overlap, and so they may be added together to make up an economic zone of the higher level.

1010:	Intra-EU Member States of the European Union 001 + 002 + 003 + 004 + 005 + 006 + 007 + 008 + 009 + 010 + 011 + 1091	473 + 488 + 492 + 801 + 806 + 807 + 812 + 815 + 816 + 817 + 819
1011:	Extra-EU Grand total less Member States of the Euro- pean Union and miscellaneous not classi- fied elsewhere 1020 + 1030 + 1060 + 1070 + 1092	1032: DOM Overseas departments of Member States of the European Union 021 + 022 + 372 + 458 + 462 + 496
1020:	Class 1 Industrialized third countries 1021 + 1022 + 1023 + 1028	1033: TOM Overseas territories of Member States of the European Union 329 + 357 + 377 + 406 + 408 + 413 + 446 + 454 + 461 + 463 + 474 + 478 + 529 + 809 + 811 + 813 + 822
1021:	EFTA European Free Trade Association 024 + 028 + 030 + 032 + 036 + 038	1038: Other developing countries 204 + 208 + 212 + 216 + 220 + 412 + 416 + 424 + 428 + 432 + 436 + 442 + 457 + 480 + 484 + 500 + 504 + 508 + 512 + 516 + 520 + 524 + 528 + 600 + 604 + 608 + 612 + 616 + 624 + 628 + 632 + 636 + 640 + 644 + 647 + 649 + 653 + 660 + 662 + 664 + 666 + 667 + 669 + 672 + 675 + 676 + 680 + 684 + 696 + 700 + 701 + 703 + 706 + 708 + 728 + 736 + 740 + 743 + 802 + 803 + 810 + 814 + 820 + 823 + 824 + 890
1022:	Other West European countries 041 + 043 + 044 + 045 + 046 + 047 + 052 + 091 + 092 + 093 + 094 + 096	
1023:	United States of America and Canada 400 + 404	
1028:	Other industrialized countries 388 + 732 + 800 + 804	1060: Class 4 Central and East European countries 053 + 054 + 055 + 060 + 061 + 063 + 064 + 066 + 068 + 070 + 072 + 073 + 074 + 075 + 076 + 077 + 078 + 079 + 080 + 081 + 082 + 083
1030:	Class 2 Developing countries 1031 + 1032 + 1033 + 1038	
1031:	ACP Countries of Africa, the Caribbean and the Pacific – Lomé Convention 224 + 228 + 232 + 236 + 240 + 244 + 247 + 248 + 252 + 257 + 260 + 264 + 268 + 272 + 276 + 280 + 284 + 288 + 302 + 306 + 310 + 311 + 314 + 318 + 322 + 324 + 328 + 330 + 334 + 336 + 338 + 342 + 346 + 350 + 352 + 355 + 366 + 370 + 373 + 375 + 378 + 382 + 386 + 389 + 391 + 393 + 395 + 421 + 449 + 452 + 453 + 456 + 459 + 460 + 464 + 465 + 467 + 469 + 472 +	1070: Class 5 State-trading countries of America and Asia 448 + 690 + 716 + 720 + 724
		1091: Miscellaneous not classified elsewhere in- tra-EU 951 + 959 + 978
		1092: Miscellaneous not classified elsewhere ex- tra-EU 952 + 960 + 979

*Table II*

In table II, the economic zones can overlap and must not, therefore, be used to make up larger units.

1051:	Mediterranean Basin Countries and territories that make up the Mediterranean Basin 022 + 044 + 046 + 052 + 070 + 091 + 092 + 093 + 094 + 096 + 204 + 208 + 212 + 216 + 220 + 600 + 604 + 608 + 624 + 628	469 + 472 + 473 + 474 + 478 + 480 + 484 + 488 + 492 + 496 + 500 + 504 + 508 + 512 + 516 + 520 + 524 + 528 + 529
