## Foreword

### 1. Introduction

The environment in which trade statistics are collected has changed radically in recent years, leading to a detailed revision of the regulations. For statistics on trade with third countries, the introduction in 1988 of the Combined Nomenclature of goods (CN) and the Single Administrative Document had already led to considerable methodological changes. However, the major changes were brought about by the introduction of the single market on 1 January 1993. This led to the abolition of customs formalities between the Member States which had served as the traditional source of trade statistics, and the introduction of a special collection system called INTRASTAT. The accession of three new member states in 1995 led Eurostat to recalculate its historical series for the European Union to include Austria, Finland and Sweden therefore figures published here concern the fifteen Members unless stated otherwise.

Trade statistics - both detailed and general results - have now proved their worth. They are an instrument of prime importance for all users, both public and private. For instance, they enable Community authorities to prepare for multilateral and bilateral negotiations on the common trade policy, they help European businesses carry out market surveys and thus improve their competitiveness and they are an essential source of information for statistics on the balance of payments, the national accounts and short-term economic studies. This non-exhaustive list highlights the variety of users and their requirements.

The monthly bulletin on external and intra-European Union trade, published by Eurostat in the B series, Short-term Trends, sets out to provide data on short-term trends in the trade of the European Union (considered as a whole) and its Member States. It contains data on the trade flows, broken down by major product group, of the EU with its main trading partners on the one hand and between the Member States on the other.

Statistics on external trade and intra-EU trade are compiled on the basis of Community regulations. The same regulations are generally the basis for the compilation of statistics published nationally by each Member State. Nevertheless, methodological differences do arise, as a result of which Community statistics and national statistics do not match exactly.

In view of the importance of trade by members of the European Free Trade Association (Iceland, Liechtenstein, Norway and Switzerland) with the European Union, Eurostat has added a description of trade with these countries (Chapter 6) to that usually

given for Member States only. Eurostat also foresees broadening this information to include third countries (notably central and eastern European countries) in accordance with bilateral agreements yet to be finalised.

Statistics on external trade and intra-EU trade at the most detailed classification level are published monthly on CD-Rom (Series B: intra and extra-EU trade). They are also available on-line from Eurostat's database (Comext, Newcronos). Trends in external trade since 1958 and a comparison with world trade are contained in the publication "*External and Intra-EU Trade Statistical Yearbook (Series A)*".

### 2. Intra-EU trade

Statistics on trade between the Member States are based on Council Regulation (EC) N° 3330/91 of 7 November 1991 and on the various implementing regulations which have supplemented it or laid down rules on methodology, thresholds and forms. The system set up for the collection of information on trade between the Member States as from 1 January 1993 is commonly known as Intrastat. Its main features are:

- monthly statistical declarations sent directly by businesses to the competent national authorities;
- a system of thresholds abolishing all statistical obligations for almost two thirds of businesses;
- a close link with the VAT system.

Because of the introduction of this new system, the comparability of the intra-EU results prior to and after 1 January 1993 is limited, owing to a degree of under-estimation of flows. This was caused by the failure of some businesses to respond and to the introduction of thresholds which exclude the smallest businesses.

To correct this under-estimation, which varies according to the Member State, some countries make adjustments at an aggregate level (in general by partner country). Arrivals, i.e. imports from other EU countries, are particularly under-estimated. Consequently, Eurostat considers dispatches now to be the most reliable gauge of intra-EU trade.

If the dispatches of a given Member State are compared with the corresponding arrivals of its partners, differences may emerge, mainly for the following reasons:

- non-response by certain businesses;

- the movement of goods such as industrial plants, boats and aircraft, automobile and aircraft parts, military equipment and transport equipment repairs, which are not generally harmonised;
- the difference in statistical values for dispatches (FOB) and arrivals (CIF);
- the threshold effect: a business may be obliged to provide statistical information in one Member State while its client or supplier, depending on the case, in the partner country may be dispensed from providing any or certain types of statistical information (e.g. product classification);
- errors or omissions.

For these reasons, figures on intra-EU trade should be interpreted with caution. They are also subject to frequent revision.

### **3. *Extra-EU trade***

For data on the years 1978 to 1995, the Member States forwarded statistics on trade outside the European Union in accordance with a uniform methodology provided for in Council Regulation (EEC) N° 1736/75 and the regulations deriving from it. Since the beginning of 1996, data have been collected, transmitted and diffused in accordance with Council Regulation (EC) N° 1172/95 and its implementing rules (Council Regulation (EC) N° 840 196) which however retain the former methodological principles.

External trade statistics are usually recorded on the basis of customs declarations submitted by the declarant when clearing customs. The Single Administrative Document is used for this purpose. In some Member States, certain businesses are allowed to make a summary declaration.

## Methodological notes and sources

### 1. Data sources

The tables in this publication on EU trade and that of the Member States were compiled by Eurostat using the detailed data forwarded by the Member States. Eurostat would like to take this opportunity to thank the departments concerned in the Member States for their co-operation, which makes it possible to compile these harmonised statistics and guarantee their quality.

Some of the tables in the first two parts describe the development of external trade as declared by some of the EU's most important trading partners. With the exception of Table 1C and the results concerning the EU, these tables were compiled from data taken from the tapes sent each month by the International Monetary Fund. The information in table 1C is taken from the Comtrade database, which is managed by the United Nations.

### 2. Coverage

Series concerning the European Union were recalculated to include Austria, Finland and Sweden and therefore relate to the Union of 15 members unless stated otherwise.

#### 2.1. Statistical territory

The statistical territory of the European Union comprises the customs territory of the European Union. From 1 January 1997 the statistical territory of France and Spain was modified to include respectively the French overseas departments (Guadeloupe, Guyana, Martinique and Réunion) and the Canary Islands. The series concerning the Union and these two Member States will be recalculated as soon as Eurostat disposes of the necessary data

In the meantime this modification has led to a growth in intra-EU trade and a reduction in extra-EU trade which in 1995 amounted to ECU 10.6 billion for exports and ECU 1.6 billion of imports. The overall effect of this change on the European Union trade balance with the rest of the world will be a reduction in the trade surplus of almost ECU 9 billion.

Likewise, Greenland, Ceuta and Melilla are not covered, nor are the overseas countries and territories which are not part of the EU customs territory.

#### 2.2. Intra-EU trade

Statistics on trade between the Member States cover the arrivals and dispatches of movable property

recorded by each Member State. Arrivals and dispatches are defined as follows:

- *arrivals* are goods in free circulation within the European Union which enter the statistical territory of a given Member State;
- *dispatches* are goods in free circulation within the European Union which leave the statistical territory of a given Member State to enter another Member State.

Goods placed under the customs arrangements of inward processing or processing under customs control (for working, processing or repairs) are also regarded as arrivals or dispatches.

The reader should also note that statistics on trade between the Member States do not cover goods in transit.

#### 2.3. Extra-EU trade

Statistics on trade with third countries cover movable property imported and exported by the European Union. The definitions are as follows:

- *imports* are goods which enter the statistical territory of the European Union from a third country and are placed under the customs procedure for free circulation (as a general rule goods intended for consumption), or following outward processing, or inward processing, or processing under customs control (goods for working, processing or repair) immediately, or after bonded warehousing;
- *exports* are goods which leave the statistical territory of the European Union for a third country after being placed under the customs procedure for exports (definitive export) or outward processing (goods for working, processing) or repair or following inward processing.

Statistics on trade with third countries do not, therefore, include goods in transit or those placed under a customs procedure for bonded warehousing or temporary entry (for fairs, exhibitions, tests, etc.) nor do they include re-export following entry under one of these procedures.

The field covered by statistics on trade with third countries corresponds to "special" trade. This method of accounting differs from that of "general" trade, which includes all goods entering the statistical territory and those leaving it, with the exception, however, of goods in transit. Goods placed in bonded warehouses and exports of goods after bonded

warehousing are included in the definition of general trade.

### **3. Statistical data**

#### **3.1. Trading partners: countries and economic areas**

The results are broken down by country and area in accordance with the "Country nomenclature for statistics on European Union external trade and trade between its Member States", referred to as the Geonomenclature (Geonom). For the purposes of presenting the results, Eurostat has defined geographical and economic areas.

In the case of exports (or dispatches), the country (or Member State) of final destination of the goods is the partner country.

The trading partner in the case of an intra-European Union arrival is always the Member State of consignment of the goods, even when the goods originate in third countries and have been placed in free circulation in the Member State of consignment. For imports (extra-EU trade) the partner country is the country of origin except in certain cases (returned goods, objects of art, etc.). Where two or more countries were involved in the production of certain goods, the country where the final processing or substantial working took place is considered to be the country of origin.

#### **3.2. Goods classification**

The most detailed results published by Eurostat and accessible to the public on magnetic medium are broken down according to the subheadings of the Combined Nomenclature (CN). This tariff and statistical nomenclature is based on the international nomenclature of the Harmonised System (HS) and comprises more than 10 000 eight-digit codes.

In this publication, the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 3 since 1988) by means of conversion tables drawn up by Eurostat on the basis of the CN.

#### **3.3. Statistical value**

Although the data is collected in units of national currency, the values set out in this bulletin have been expressed, after monthly conversion, in European Units of Account (ECU). The annex to the bulletin contains a table showing the conversion rates used. The reader should note that annual exchange rates are given for information only, annual values are calculated as the sum of monthly values

#### **3.3.1. Intra-European Union trade**

The statistical value is based on the assessment for taxation purposes or the amount billed. It is the FOB (free on board) value for dispatches and the CIF (cost, insurance, freight) value for arrivals. It comprises only those subsidiary costs (freight and insurance) which relate, for dispatches, to the journey to the border of the Member State from which the goods are dispatched and, for arrivals, to the journey to the border of the Member State into which the goods enter.

In the case of arrivals or dispatches under an inward or outward processing arrangement and those for processing of work under contract, it is always the total value of the goods that is recorded and not simply the added value.

#### **3.3.2. Extra-European Union trade**

The statistical value is based on the amount billed (real or provisional) or if it exists, on the customs value. It is the FOB value for exports and the CIF value for imports. It comprises only those subsidiary costs (freight and insurance) which relate, for exports, to the journey within the territory of the Member State from which the goods are exported and, for imports, to the journey outside the territory of the Member State into which the goods are imported.

In the case of imports or exports under an inward or outward processing arrangement and those for processing of work under contract, it is always the total value of the goods that is recorded and not simply the added value.

#### **3.4. Statistical secrecy**

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The legislation, the procedures for implementing it, and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data: it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only, or to exports only, or to only some of the variables recorded (value, statistical procedure, quantities, partner country, etc.).

Measures are taken during collection and during processing by Eurostat to minimise the effect of confidentiality on the results. In particular, subheadings which include confidential trade data are included at higher levels of aggregation and in totals.

## **4. Indices**

### *4.1. Introduction*

Changes over time in the value of trade are influenced by changes in prices and the quantities marketed. Eurostat calculates Fisher's annual chain indices to measure these two effects. This publication sets out the indices calculated according to the SITC for each Member State on a strictly comparable basis. These indices may be consulted in the TREND database.

### *4.2. Methodology*

The data transmitted for external trade and intra-European Union trade statistics are used at the most detailed level for calculating the indices. The indices of unit values (values divided by quantities) are used as price change indicators. The computer programs contain a system for automatically identifying extreme unit values.

Products having unlikely price movements are not included in the calculation of indices. More detailed methodological notes may be obtained on request.

## Trends in European Union trade

## MAIN TRENDS IN WORLD TRADE

In the period January-February 1997 the European Union's trade balance recorded a surplus of ECU 0.8 billion, while in the corresponding period of 1996 it had registered a deficit .

During January-February 1997, the United States' deficit worsened, reaching more than ECU 27 billion, while Japan's external trade showed a surplus of ECU 4.8 billion.

In the first two months of 1997 the EU as a whole confirmed its position as the world's leading exporter, while the United States was the most important world outlet.

During the first two months of 1997, the **EU's**<sup>1</sup> external trade balance showed a surplus of ECU 0.8 billion, whereas in January-February 1996 it had recorded a deficit of ECU 2.6 billion. The growth rates of extra-EU exports and imports were 10% and 6.2% respectively.

Even if its share declined compared with 1996, in the period under consideration the EU as a whole confirmed its position as the leading world exporter accounting for 19% of world exports (ECU 101.6 billion), while in imports it ranked second with 17% (ECU 100.8 billion).

In the period January-February 1997, the **United States'** trade deficit worsened compared with a year earlier and amounted to ECU 27.4 billion. The growth

rates of exports and imports compared with January-February 1996 were 15.7% and 17.1% respectively.

The United States confirmed its first place in the world ranking of importers with a share of 19.4% and the second place of exporters with a share of 16.3% .

In the first two months of 1997, **Japan's** trade recorded a surplus of ECU 4.8 billion, down from ECU 5.1 billion registered in the corresponding period of the previous year. The growth rates of Japanese exports and imports were 7.6% and 9.1% respectively.

As a result, the Japanese share of world exports and imports fell to 9.8% and 8.1% respectively.

<sup>1</sup> The European Union's figures for 1997 are provisional and subject to frequent revisions. The symbol ":" indicates that the figure is not available.

## EXTRA-EU TRADE BY MAIN PARTNER

**The EU balance with its Central and Eastern European (CEEC) partners showed the largest surplus in the first two months of 1997 (ECU 3.3 billion), followed by the other Asian countries (ECU 2.2 billion). In contrast, trade with China and Japan registered the highest deficits (ECU 3.8 and 2.6 billion respectively).**

Trade flows with the **United States** (the EU's most important individual partner, with shares of 18.3% and 19.4% respectively for exports and imports in 1996) showed a surplus of ECU 0.2 billion in the period January-February 1997. This represents an improvement compared with the same period of the previous year, when the EU-US balance showed a deficit of ECU 1.8 billion. Export and import growth rates for January-February 1997 were 16.6% and 4.9% respectively.

Between January-February 1996 and the same period of 1997 the trade balance with **Japan** improved by ECU 0.5 billion to register an ECU 2.6 billion deficit, while trade with the **EFTA** countries worsened, recording a deficit of ECU 1 billion.

EU exports to Japan were in fact quite dynamic in the first two months of 1997, with a growth rate over the previous year of 9.2%, while imports over the same period showed a negative rate of change (-0.3%).

In January-February 1997, EU exports and imports to the **CIS** and the **CEEC** partners showed very dynamic flows in comparison with the same period of 1996 (growth rates of +17.6% and +20.3% for exports, while the corresponding imports grew by +32.5% and +13.8% respectively). As a result, the EU trade balances with CIS and CEEC partners (which in 1996 together accounted for around 14% of total extra-EU flows) worsened by ECU 0.6 billion and improved by ECU 1 billion respectively, registering a deficit of ECU 1 billion for CIS countries and a surplus of ECU 3.3 billion for CEEC partners.

The total values of EU exports to **DAE** and **other Asian countries** in the first two months of 1997 were quite similar (more than ECU 11 billion), but growth rates were higher for the latter (12.6% compared with 6.7% for the former). The results were similar for imports, with growth rates of 2.8% for DAE countries and 10% for other Asian countries. As a result, the EU surplus with these countries improved to ECU 1.1 billion surplus for DAE partners and ECU 2.2 billion for other Asian countries.

As for **Latin America**, the export growth rate was impressive (29.5% compared with the same period of the previous year) while the import growth rate was negative (-7%).

The period January-February 1997 saw a sharp rise in EU imports from **China** (+13.3% compared with the same period of 1996), together with a decrease in the value of the Union's exports (-3.1%). As a result, the EU-China trade deficit rose by ECU 0.7 billion compared with January-February 1996 to reach ECU 3.8 billion.

Trade with **Oceania** showed a surplus of ECU 1.1 billion in the first two months of 1997, which was an improvement of ECU 0.2 billion in comparison with the same period of 1996.

As for **Africa**, extra-EU exports went down by 8.1%, while imports grew by 10.1% (However, these figures have to be interpreted taking into account the inclusion, since January 1997, of the Canary Islands and Réunion in the Spanish and French customs territories respectively).

## EXTRA-EU TRADE BY MAIN PRODUCT

**In the first two months of 1997, the EU's trade balance in machinery and transport equipment recorded the greatest surplus (ECU 13.5 billion), while fuel products showed the largest deficit (ECU 11.9 billion).**

In the period January-February 1997 the deficit on **primary goods (SITC 0-4)** rose to ECU 16.4 billion compared with ECU 14.9 billion in the corresponding period of the previous year.

The EU trade deficit in fuel products (SITC 3) grew to ECU 11.9 billion, while the balance for food, beverages and tobacco (SITC 0+1) and raw materials except fuel (SITC 2+4) showed a slight improvement and recorded deficits of ECU 0.5 billion and ECU 4 billion respectively.

Between January-February 1996 and the same period a year later, the growth rates of the flows for primary goods (which in 1996 accounted for 11.2% of total extra-EU exports and 28% of imports) were 9.7% for exports and 9.8% for imports.

The increase in international oil prices which had started in the second half of 1996, continued at the beginning of 1997 (the ECU cost of the EU's crude oil supplies rose by 32.5% in the first two months of 1997), and partly propped up the value of trade in fuel products (SITC 3). The export and import flows grew by 20.9% and 27.2% respectively. In addition, other raw materials (SITC 2+4) registered a positive

growth rate for exports of 12.5% and a negative rate for imports of -0.9% respectively.

As for **manufactured products (SITC 5-8)**, which accounted for 87% of total extra-EU exports and 69% of imports in 1996, during the first two months of 1997 the EU's external trade showed a surplus of ECU 18.6 billion compared with ECU 14.1 billion for the same period in 1996.

In the period January-February 1997, the EU surplus for machinery and transport equipment (SITC 7) and chemical products (SITC 5) reached ECU 13.5 billion and ECU 5.9 billion respectively, while other manufactured goods (SITC 6+8) recorded a deficit of ECU 0.8 billion.

Among the sections encompassing manufactured products, the most significant growth rates were recorded for trade in machinery and transport equipment (SITC 7), up by 11.5% for exports and by 6.3% for imports.

## EXTRA-EU TRADE BY MEMBER STATE

**Germany achieved the largest extra-EU surplus followed by Sweden and Italy, while the Netherlands and the United Kingdom registered the highest external deficits.**

In the period January-February 1997, **Germany** was the EU Member State with the largest extra-EU trade surplus, amounting to ECU 3.4 billion. This is the same figure as the previous year. Germany's growth rates for exports and imports were 7.9% and 8.9% respectively.

Germany is also the most important EU player in trade with third countries. Its 1996 share of total extra-EU exports amounted to 28.2%, while the figure for imports was 24.7%.

The second-ranking country in trade value terms was the **United Kingdom** (which in 1996 accounted for 13.8% and 17.9% of exports and imports respectively). The UK also had the second largest trade deficit (ECU 2.2 billion) in the first two months of 1997. However, it improved by ECU 1.8 billion in the period under consideration.

**Italy** recorded a surplus of ECU 1.9 billion, which means an improvement of ECU 0.6 billion over January-February 1996. This improvement was due to the surge in extra-EU exports (+7.4%), while imports grew by only 2.4%.

During the first two months of 1997, **France's** imports increased faster than its exports over the same period in 1996, the growth rates being 6.8% and 3.2% respectively. As a consequence, France's trade balance worsened compared with the previous year and reached a surplus of only ECU 1 billion.

During January-February 1997 the extra-EU deficit of the **Netherlands** went down by 0.9 billion compared with January-February 1996. However, it still represented the largest deficit among the EU Member States (ECU 4.2 billion). This deficit must, however,

be interpreted in conjunction with the intra-EU Dutch surplus and the country's transit role in EU trade. Between January-February 1996 and the same period of 1997, Dutch exports and imports recorded negative growth rates of 0.5% and 9.2 respectively.

As for **Belgium/Luxembourg (BLEU)**, during the first two months of 1997 the growth rate of exports was higher than that of imports (17.6% and 8.5% respectively). Due to this fact, the overall balance of these two countries improved and recorded a smaller deficit of ECU 0.4 billion in comparison with the previous year.

In January-February 1997 **Finland** and **Sweden** registered surpluses in their extra-EU trade balance. Finland's extra-EU exports and imports recorded growth rates of 1.6% and 5.3% respectively, while Sweden registered higher rates of change (+10.1% for exports and +4.4% for imports).

During the first two months of 1997, **Austria's** growth rates for imports and exports recorded the same figure (12%), resulting in a small surplus in its trade balance.

Of the five remaining Member States (which together accounted for about 10% of extra-EU flows in 1996), **Greece** and **Ireland** registered positive growth rates in their extra-EU exports and negative growth rates in their imports (+24.3% and +8% for exports and -5.1% and -8.7% for imports respectively).

In contrast, for the period under consideration, **Portugal, Spain** and **Denmark** saw a positive gap between their growth rates for imports and exports.

## INTRA-EU TRADE BY MEMBER STATE<sup>1</sup>

**In the period January-February 1997, the Netherlands and Germany produced the two largest intra-EU surpluses, while Austria recorded the highest intra-EU deficit.**

In the period January-February 1997 intra-EU trade showed a total value for dispatches (i.e. exports, which are the more reliable measure of intra-EU trade) of around ECU 180 billion, representing an increase of 3.2% compared with the same period of the previous year.

The **Netherlands** was the Member State with the largest intra-EU surplus. During the first two months of 1997 it grew to ECU 7.3 billion, up by 1.3 billion on the same period of 1996. However, as mentioned before, it must be stressed that this figure has to be interpreted in the light of the Dutch extra-EU deficit and the country's transit role in EU trade. In January-February 1997, the growth rate of Dutch intra-EU dispatches was 8.6%, while there was a sluggish performance for arrivals (+3%).

As in the case of extra-EU trade, **Germany** was the most important player in trade with the EU partners, its 1996 share of total intra-EU trade amounting to around 21%. During the first two months of 1997, it registered the second largest intra-EU trade surplus (ECU 4 billion) - an increase of ECU 0.5 billion compared with the previous year.

**France** ranked second in volume of trade with EU partners, with a 1996 share of 15%. In January-February 1997, its intra-EU trade was in balance, improving by ECU 1.1 billion in comparison with the deficit registered in the corresponding period of 1996.

The **United Kingdom's** intra-EU deficit fell to ECU 0.3 billion. The UK's growth rates for arrivals and dispatches in the period under consideration were 6.1% and 9.1% respectively.

In general, **Italy** and **Ireland** saw more moderate growth rates at the beginning of 1997 compared with 1996. For dispatches, the rates were 0.6% and 3.3% respectively, while the figures for arrivals were 0.4% and 18.1%. As a result, the intra-EU surplus remained stable for Italy and decreased by ECU 0.4 billion for Ireland in comparison with the period January-February 1996.

With a 1996 share of around 10%, **Belgium/Luxembourg (BLEU)** were also important players in intra-EU trade. During the first two months of 1997, these countries recorded an overall surplus of ECU 1.7 billion. This represented a slight deterioration (ECU 0.1 billion) compared with the previous year.

As far as the three new Member States are concerned, **Sweden** and **Finland** confirmed their small surpluses with their EU partners, whereas **Austria** showed a deficit of ECU 1.5 billion.

Of the remaining four Member States (together accounting for around 12% of intra-EU trade in 1996), only **Denmark** displayed a small intra-EU surplus in the first two months of 1997 (ECU 0.3 billion), while **Spain**, **Portugal** and **Greece** registered internal deficits of ECU 0.5, 0.7, and 1.4 billion respectively.

<sup>1</sup> On 1 January 1993, following the abolition of customs controls in the EU, a new collection system for intra-EU data (Intrastat) was introduced. Instead of being derived from customs declarations, trade figures are now compiled from data provided directly by companies.

# SEASONALLY ADJUSTED TIME SERIES OF EU TRADE

## Extra-EU trade<sup>1</sup>

EU exports in February 1997 were 7.7% up on the same month in 1996 at a seasonally adjusted ECU 54 billion. This figure was 0.9% higher than in January. An already long-standing upward trend - albeit somewhat blurred by last year's extremely high July and October figures - thus appeared to continue.

Despite a slight drop of ECU 0.3 billion, EU imports have remained on an upward trajectory sustained ever since enlargement in January 1995. Since then, they have shown a seasonally adjusted increase of ECU 6.6 billion. For February 1997, the year-on-year rise was 8.1% or ECU 3.8 billion.

In February 1997 there was a further rise in the seasonally adjusted external trade balance to ECU 3.1 billion, which thus remained within the ECU 1 to 4 billion range recorded since EU enlargement. Only in the second half of 1996 did the balance exceed these limits as a result of extremely high export figures.

## Intra-EU trade<sup>2</sup>

Seasonally adjusted intra-EU trade, which had remained around ECU 90 billion since August 1996, rose again in February 1997, increasing by ECU 2.7 billion or 3.1% to ECU 92.1 billion.

..... Unadjusted series

———— Seasonally adjusted series

<sup>1</sup> The series described here relate to EUR 12 up to and including 1994 and to EUR 15 as from 1995 (when Finland, Sweden and Austria joined the EU).

<sup>2</sup> Dispatches are used to represent intra-EU trade. Figures for the years up to and including 1994 relate to EUR 12.

(1) The ECU is a 'basket' monetary unit based on the market exchange rates of certain quantity of each European Union currency weighted on the basis of the average gross national product over five years and of the intra-EU trade of each Member State. The rates used here are averages of the daily rates.

## PRODUCT LIST : SITC REV. 3

### 0 Food and live animals

- 00 Live animals other than animals of division 03
- 01 Meat and meat preparations
- 02 Dairy products and birds' eggs
- 03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof
- 04 Cereals and cereal preparations
- 05 Vegetables and fruit
- 06 Sugars, sugar preparations and honey
- 07 Coffee, tea, cocoa, spices, and manufactures thereof
- 08 Feeding stuff for animals (not including unmilled cereals)
- 09 Miscellaneous edible products and preparations

### 1 Beverages and tobacco

- 11 Beverages
- 12 Tobacco and tobacco manufactures

### 2 Crude materials, inedible, except fuels

- 21 Hides, skins and fur skins, raw
- 22 Oil seeds and oleaginous fruits
- 23 Crude rubber (including synthetic and reclaimed)
- 24 Cork and wood
- 25 Pulp and waste paper
- 26 Textile fibres (other than wool tops and other combed wool), and their wastes (not manufactured into yarn or fabric)
- 27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
- 28 Metalliferous ores and metal scrap
- 29 Crude animal and vegetable materials, n.e.s.

### 3 Mineral fuels, lubricants and related materials

- 32 Coal, coke and briquettes
- 33 Petroleum, petroleum products and related materials
- 34 Gas, natural and manufactured
- 35 Electric current

### 4 Animal and vegetable oils, fats and waxes

- 41 Animal oils and fats
- 42 Fixed vegetable fats and oils, crude, refined or fractionated
- 43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s

### 5 Chemicals and related products, n.e.s

- 51 Organic chemicals
- 52 Inorganic chemicals
- 53 Dyeing, tanning and colouring materials
- 54 Medical and pharmaceutical products
- 55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 Fertilizers (other than those of group 272)
- 57 Plastics in primary forms
- 58 Plastics in non-primary forms
- 59 Chemical materials and products, n.e.s

### 6 Manufactured goods classified chiefly by material

- 60 Complete industrial plant appropriate to section 6
- 61 Leather, leather manufacture, n.e.s, and dressed fur skins
- 62 Rubber manufacture, n.e.s
- 63 Cork and wood manufacture (excluding furniture)
- 64 Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 65 Textile yarn, fabrics, made-up articles, n.e.s, and related products
- 66 Non-metallic mineral manufactures, n.e.s
- 67 Iron and steel
- 68 Non-ferrous metals
- 69 Manufacture of metals, n.e.s

## PRODUCT LIST : SITC REV. 3

### **7 Machinery and transport equipment**

- 70 Complete industrial plant appropriate to section 7
- 71 Power-generating machinery and equipment
- 72 Machinery specialized for particular industries
- 73 Metal working machinery
- 74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s
- 75 Office machines and automatic data-processing machines
- 76 Telecommunications and sound recording and reproducing apparatus and equipment
- 77 Electrical machinery, apparatus and appliances, n.e.s and electrical parts thereof (including non-electrical counterparts n.e.s of electrical household type equipment)
- 78 Road vehicles (including air-cushion vehicles)
- 79 Other transport equipment

### **8 Miscellaneous manufactured articles**

- 80 Complete industrial plant appropriate to section 8
- 81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s
- 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 Travel goods, handbags and similar containers
- 84 Articles of apparel and clothing accessories
- 85 Footwear
- 87 Professional, scientific and controlling instruments and apparatus, n.e.s
- 88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks
- 89 Miscellaneous manufactured articles, n.e.s

### **9 Commodities and transactions not classified elsewhere in SITC**

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 94 Complete industrial plant, not elsewhere specified
- 96 Coin (other than gold coin) not being legal tender
- 97 Gold, non-monetary (excluding gold, ores and concentrates)
