<b>Press releases:</b> Eurostat publishes around 100 press releases every year in connection with the release of new data. The press releases include the key figures on the EU, the Member States and their partners. They are provided free of charge. They are also available on the Internet as soon as they are published: <a href="http://www.europa.eu.int/comm/eurostat/">www.europa.eu.int/comm/eurostat/</a>				        	Paper HTML PDF
<b>Statistics in focus:</b> This collection is published regularly by Eurostat and provides up-to-date summaries of the main results of statistical surveys, studies and analyses. It covers all themes and consists of about four to eight pages per issue. Eurostat issues around 150 <i>Statistics in focus</i> per year. Available as single copies or on subscription.				        	Paper PDF
<b>Pocketbooks:</b> This collection provides the main indicators on a theme or sub-theme in an easy-to-carry booklet of up to 100 pages. Available as single copies or on subscription.				        	Paper HTML
<b>Panorama of the European Union:</b> This collection highlights the features and trends of a multi-sectoral theme or a sectoral sub-theme. The publications consist of around 200 pages and include analyses as well as tables and graphs. Available as single copies or on subscription.				        	Paper CD-ROM
<b>Methods and nomenclatures:</b> intended for specialists who want to consult the methodologies and nomenclatures used for a theme, a sub-theme or a sector. Available as single copies.				        	Paper CD-ROM
<b>Detailed tables</b> are intended for specialists. They present part, or all, of the statistical data compiled on a theme, sub-theme or sector. Available as single copies or on subscription.				        	Paper CD-ROM
<b>Catalogues</b> provide rapid access to concise information on Eurostat's products and services. They are free of charge and include the <i>mini-guide</i> , a selection of Eurostat products and services, and <i>Statistical references</i> , the quarterly newsletter on Eurostat's latest products and services. ## Eurostat Data Shops

### A personalised data retrieval service

In order to provide the greatest possible number of people with access to high-quality statistical information, Eurostat has developed an extensive network of Data Shops ('').

Data Shops provide a wide range of **tailor-made services**:

- ★ immediate information searches undertaken by a team of experts in European statistics,
- ★ rapid and personalised response that takes account of the specified search requirements and intended use,
- ★ a choice of data carrier depending on the type of information required.

Information can be requested by phone, mail, fax or e-mail.

('') See the list of Eurostat Data Shops at the end of this publication.

## Internet

### Essentials on Community statistical news

- ★ Euro indicators: more than 100 indicators on the euro zone; harmonised, comparable, and free of charge.
- ★ About Eurostat: what it does and how it works.
- ★ Products and databases: a detailed description of what Eurostat has to offer.
- ★ Indicators on the European Union: convergence criteria; euro yield curve and further main indicators on the European Union at your disposal.
- ★ Press releases: direct access to all Eurostat press releases.

For further information, visit us on the Internet: [WWW.europa.eu.int/comm/eurostat/](http://WWW.europa.eu.int/comm/eurostat/)

*Europe Direct is a service to help you find answers to your questions about the European Union*

---

Eurostat is the Statistical Office of the European Communities. Its task is to provide the European Union with statistics, at a European level, that allow comparisons to be made between countries and regions. Eurostat consolidates and harmonises the data collected by the Member States.

To ensure that the vast quantity of accessible data is made widely available and to help each user make proper use of the information, Eurostat has set up a publications and services programme.

This programme makes a clear distinction between general and specialist users and particular collections have been developed for these different groups. The collections *Press releases*, *Statistics in focus*, *Panorama of the European Union*, *Pocketbooks* and *Catalogues* are aimed at general users. They give immediate key information through analyses, tables, graphs and maps.

The collections *Methods and nomenclatures* and *Detailed tables* suit the needs of the specialist who is prepared to spend more time analysing and using very detailed information and tables.

All Eurostat products are disseminated through the Data Shop network or the sales agents of the Office for Official Publications of the European Communities. Data Shops are available in 12 of the 15 Member States as well as in Switzerland, Norway and the United States. They provide a wide range of services from simple database extracts to tailor-made investigations. The information is provided on paper and/or in electronic form via e-mail, on diskette or on CD-ROM.

As part of the new programme, Eurostat has developed its web site. It includes a broad range of online information on Eurostat products and services, newsletters, catalogues, online publications and indicators on the euro zone.

## **Foreword**

### **1. Introduction**

The environment in which trade statistics are collected has changed radically in recent years, leading to a detailed revision of the regulations. For statistics on trade with non-member countries, the introduction in 1988 of the Combined Nomenclature of goods (CN) and the Single Administrative Document had already led to considerable methodological changes. However, the major changes were brought about by the introduction of the single market on 1 January 1993. This led to the abolition of customs formalities between the Member States which had served as the traditional source of trade statistics, and the introduction of a special collection system called INTRASTAT. The accession of three new member states in 1995 led Eurostat to recalculate its historical series for the European Union to include Austria, Finland and Sweden; therefore figures published here concern the fifteen Members unless stated otherwise.

Trade statistics - both detailed and global results - have now proved their worth. They are an instrument of prime importance for both public and private users. For instance, they enable Community authorities to prepare multilateral and bilateral negotiations on common trade policy; they help European businesses to carry out market surveys and thus improve their competitiveness; they are an essential source of information for statistics on the balance of payments, the national accounts and short-term economic studies. This non-exhaustive list highlights the variety of users and their requirements.

The monthly bulletin on external and intra-European Union trade provide data on short-term trends in the trade of the European Union (considered as a whole) and its Member States. It contains data on the trade flows, broken down by major product group, of the EU with its main trading partners on one hand and between the Member States on the other.

Statistics on external trade and intra-EU trade are compiled on the basis of Community regulations. The same regulations are generally the basis for the compilation of statistics published nationally by each Member State. Nevertheless, methodological differences do arise, as a result of which Community statistics and national statistics do not match exactly.

In view of the next enlargements of the European Union and taking into account the importance of trade by members of the European Free Trade Association (Iceland, Liechtenstein, Norway and Switzerland) with the Union, a description of trade with the candidate countries (chapter 6) and the EFTA countries (chapter 7) has been added to that usually given for Member States only.

Statistics on external trade and Intra-EU trade at the most detailed classification level are published monthly on CD-ROM. They are also available on-line from the Eurostat's databases (Comext, Newcronos). Trends in external trade since 1958 and a comparison with world trade are contained in the publication "*External and Intra-EU Trade Statistical Yearbook*".

### **2. Intra-EU trade**

Statistics on trade between the Member States are based on Council Regulation (EC) N° 3330/91 of 7 November 1991 and on the various implementation regulations which have supplemented it or laid down rules on methodology, thresholds and forms. The system set up for the collection of information on trade between the Member States as from 1 January 1993 is commonly known as Instrastat. Its main features are:

- Monthly statistical declarations sent directly by businesses to the competent national authorities;
- A system of thresholds abolishing all statistical formalities for almost two thirds of businesses;
- A close link with the tax system.

With the introduction of this new system, the comparability of Intra-EU results before and after 1 January 1993 is limited, owing to a degree of under-estimation of flows. This is because of some businesses' failure to respond and the introduction of thresholds which exclude the smallest businesses. To correct this under-estimation, which varies according to the Member State, some countries make adjustments at an aggregate level (in general by partner country). Arrivals, i.e. imports from other EU countries, are particularly under-estimated. Consequently, Eurostat considers dispatches now to be the most reliable gauge of Intra-EU trade.

If the dispatches of a given Member State are compared with the corresponding arrivals of its partners, differences may emerge, mainly for the following reasons:

- Non-response by certain businesses;
- Some particular movements of goods no yet harmonized: postal consignments, sets of vehicles, etc.
- Errors or omissions.

For these reasons, figures on intra-EU trade should be interpreted with caution. They are also subject to frequent revision.

### **3. *Extra-EU trade***

For data relating to the years 1978 to 1995, the Member States forwarded statistics on trade outside the European Union in accordance with a uniform methodology provided for in Council Regulation (EEC) N° 1736/75 and the regulations deriving from it. Since the beginning of 1996, data have been collected, transmitted and diffused in accordance with Council Regulation (EC) N° 1172/95 and its implementing rules (Council Regulation (EC) N° 840/1996) which however retain the former methodological principles.

External trade statistics are usually recorded on the basis of customs declarations submitted by the declarant when clearing customs. The Single Administrative Document is used for this purpose. In some Member States, certain businesses are allowed to make a summary declaration.

## Methodological notes and sources

### 1. Data sources

The tables in this publication on EU trade and that of the Member States were compiled by Eurostat using the detailed data forwarded by the Member States. Eurostat would like to take the opportunity to thank the departments concerned in the Member States for their cooperation, which makes it possible to compile these harmonized statistics and guarantee their quality.

Some of the tables in the first two parts describe the development of external trade as declared by some of the EU's most important trading partners. With the exception of table 1C and the results concerning the EU, these tables were compiled from data transmitted each month by the International Monetary Fund. Information in table 1C are taken from the Comtrade database that is managed by the United Nations.

### 2. Coverage

Series concerning the European Union were recalculated to include Austria, Finland and Sweden and therefore relate to the Union of 15 members unless stated otherwise.

#### 2.1. Statistical territory

The statistical territory of the European Union corresponds to the customs territory of the European Union. From 1 January 1997 the statistical territories of France and Spain were modified to include respectively the French overseas departments (Guadeloupe, Guyana, Martinique and Reunion) and the Canary Islands.

That modification has lead to a growth in intra-EU trade and a reduction in extra-EU trade that amounted to ECU 10.6 billion for exports and ECU 1.6 billion for imports in 1995. The overall effect of this change on the European Union trade balance with the rest of the world will be a reduction in the trade surplus of almost ECU 9 billion.

Likewise, Greenland, Ceuta and Melilla are not covered, nor are the overseas countries and territories that are not part of the EU customs territory.

#### 2.2. Intra-EU trade

Statistics on trade between the Member States cover the arrivals and dispatches of movable goods recorded by each Member State. Arrivals and dispatches are defined as follows:

- *arrivals* are goods in free circulation within the European Union which enter the statistical territory of a given Member State;
- *dispatches* are goods in free circulation within the European Union which leave the statistical territory of a given Member State to enter another Member State.

Goods placed under the customs arrangements of inward processing or processing under customs control (for working, processing, or repairs) are also regarded as arrivals or dispatches.

Consequently, statistics on trade between the Member States do not cover goods in transit or trade between Member States and the French overseas departments or the Canary Islands.

#### 2.3 Extra-EU trade

Statistics on trade with third countries cover movable property imported and exported by the European Union. The definitions are as follows:

- *imports* are goods which enter the statistical territory of the European Union from a third country and are placed under the customs procedure for free circulation (as a general rule goods intended for consumption), inward processing or processing under customs control (goods for working, processing or repair) immediately or after bonded warehousing;
- *exports* are goods which leave the statistical territory of the European Union for a third country after being placed under the customs procedure for exports (definitive export) or outward processing (goods for working, processing) or repair or following inward processing.

Statistics on trade with third countries do not, therefore, include goods in transit or those placed under a customs procedure for bonded warehousing or temporary entry (for fairs, exhibitions, tests, etc.) nor do they include re-export following entry under one of these procedures.

The field covered by statistics on trade with third countries corresponds to "special" trade. This method of accounting differs from that of "general" trade, which includes all goods entering the statistical territory and those leaving it, with the exception of goods in transit. Goods placed in bonded warehouses and exports of goods after bonded warehousing are included in the definition of general trade.

### **3. Statistical data**

#### **3.1. Trading partners: countries and economic areas**

The results are broken down by country and area in accordance with the "Country nomenclature for statistics on European Union external trade and trade between its Member States", referred to as the Geonomencalature (Geonom). For the purposes of presenting the results, Eurostat has defined geographical and economic areas.

In the case of exports (or dispatches), *the country (or Member State) of final destination* of the goods is the partner country.

The trading partner in the case of an Intra-European Union arrival is always the *country of consignment* of the goods, even when the goods originate in third countries and have been placed in free circulation in the country of consignment. For imports (Extra-EU trade) the statistics show, except in certain cases (returned goods, works of art, etc.), *the country of origin*. Where two or more countries were involved in the production of certain goods, the country where the final processing or substantial working took place is considered to be the country of origin.

#### **3.2. Goods classification**

The most detailed results published by Eurostat are broken down according to the subheadings of the Combined Nomenclature (CN). This tariff and statistical nomenclature is based on the international nomenclature of the Harmonized System (HS) and comprises around 10 000 eight-digit codes.

In this publication, the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 3 since 1988) by means of conversion tables drawn up by Eurostat on the basis of the CN.

#### **3.3. Estimate of the statistical value**

Although the data are collected in units of national currency, the values set out in this bulletin have been expressed, after monthly conversion, in euros. The Annex to the bulletin contains a table showing the conversion rates used. The reader should note that annual exchange rates are given for information only. Annual values are equal to the sum of monthly values expressed in euros.

#### **3.3.1 Intra-European Union trade**

The statistical value is based on the assessment basis for taxation purposes or the transaction value of the goods. It is the FOB (free on board) value for dispatches and the CIF (cost, insurance, freight) value for arrivals. It comprises only those subsidiary costs (freight and insurance) which relate, for dispatches, to the journey within the territory of the Member State from which the goods are dispatched and, for arrivals, to the journey outside the territory of the Member State into which the goods enter.

In the case of arrivals or dispatches under an inward or outward processing arrangement and those for outside processing, it is always the total value of the goods that is recorded and not simply the added value.

#### **3.3.2 Extra-European Union trade**

The statistical value is based on the customs value or, failing that, the transaction value of the goods. It is the FOB value for exports and the CIF value for imports. It comprises only those subsidiary costs (freight and insurance) which relate, for exports, to the journey within the territory of the Member State from which the goods are exported and, for imports, to the journey outside the territory of the Member State into which the goods are imported.

In the case of imports or exports under an inward or outward processing arrangement and those for outside processing, it is always the total value of the goods that is recorded and not simply the added value.

#### **3.4 Statistical secrecy**

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The legislation, the procedures for implementing it and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data: it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only or to exports only and to only some of the variables recorded (value, statistical procedure, quantities, partner country, etc.).

Measures are taken during collection and during processing by Eurostat to minimize the effect of these headings on the results; therefore trade data under these headings are included at higher levels of aggregation and in totals.

## 4. Indices

### 4.1. *Introduction*

Changes over time in the value of trade are influenced by changes in prices and the quantities marketed. Eurostat calculates Fisher's annual chain indices to measure these two effects. This publication sets out the indices calculated according to the SITC for each Member State on a strictly comparable basis.

### 4.2. *Methodology*

The data transmitted for external trade and Intra-European Union trade statistics are used at the most detailed level for calculating the indices. The indices of unit values (values divided by quantities) are used as price change indicators.

The computer programs contain a system for automatically identifying extreme unit values.

Products having unlikely price movements are not included in the calculation of indices.

Three rules are applied to exclude unlikely price behavior. The first one consists in excluding the products for which historical data have not shown a significant correlation between the trade values and the quantities. The second rule is based on the hypothesis that, given the general level of inflation, the price of a product can not vary significantly from one year to another. The third rule - which is more restrictive - is that the change in the price of a product compared with the closest month available will not differ significantly from the average change in the price of similar products. The application of these rules prevents extreme changes due to factors unrelated to prices which, otherwise, would lead to a distortion of the unit value index. For products whose unit values are rejected, the changes are drawn up according to those of similar products.

(1) Since the introduction of Intrastat the value of dispatches has been consistently higher than the value of arrivals.

In theory, as dispatches are declared FOB and arrivals CIF, the value of arrivals should be about 1% higher than dispatches.

Eurostat believes that dispatches are the more reliable measure as arrivals are considered to be underestimated.

(\*) In percentage points

Source: EUROSTAT-COMEEXT

(1) Since the introduction of Instratstat the value of dispatches has been consistently higher than the value of arrivals.  
In theory, as dispatches are declared FOB and arrivals CIF, the value of arrivals should be about 1% higher than dispatches.  
Eurostat believes that dispatches are the more reliable measure as arrivals are considered to be underestimated.

(\*) In percentage points

## SEASONALLY ADJUSTED TIME SERIES

EXTRA-EU trade: the series described here relate to EU-15 (data for Finland, Sweden and Austria have been estimated before 1995).

INTRA-EU trade: dispatches are used to represent intra-EU trade. Figures relate to EU-15.

## PRODUCT LIST : SITC REV. 3

### 0 Food and live animals

- 00 Live animals other than animals of division 03
- 01 Meat and meat preparations
- 02 Dairy products and birds' eggs
- 03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof
- 04 Cereals and cereal preparations
- 05 Vegetables and fruit
- 06 Sugars, sugar preparations and honey
- 07 Coffee, tea, cocoa, spices, and manufactures thereof
- 08 Feeding stuff for animals (not including unmilled cereals)
- 09 Miscellaneous edible products and preparations

### 1 Beverages and tobacco

- 11 Beverages
- 12 Tobacco and tobacco manufactures

### 2 Crude materials, inedible, except fuels

- 21 Hides, skins and fur skins, raw
- 22 Oil seeds and oleaginous fruits
- 23 Crude rubber (including synthetic and reclaimed)
- 24 Cork and wood
- 25 Pulp and waste paper
- 26 Textile fibres (other than wool tops and other combed wool), and their wastes (not manufactured into yarn or fabric)
- 27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
- 28 Metalliferous ores and metal scrap
- 29 Crude animal and vegetable materials, n.e.s.

### 3 Mineral fuels, lubricants and related materials

- 32 Coal, coke and briquettes
- 33 Petroleum, petroleum products and related materials
- 34 Gas, natural and manufactured
- 35 Electric current

### 4 Animal and vegetable oils, fats and waxes

- 41 Animal oils and fats
- 42 Fixed vegetable fats and oils, crude, refined or fractionated
- 43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s

### 5 Chemicals and related products, n.e.s

- 51 Organic chemicals
- 52 Inorganic chemicals
- 53 Dyeing, tanning and colouring materials
- 54 Medical and pharmaceutical products
- 55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 Fertilizers (other than those of group 272)
- 57 Plastics in primary forms
- 58 Plastics in non-primary forms
- 59 Chemical materials and products, n.e.s

### 6 Manufactured goods classified chiefly by material

- 60 Complete industrial plant appropriate to section 6
- 61 Leather, leather manufacture, n.e.s., and dressed fur skins
- 62 Rubber manufacture, n.e.s.
- 63 Cork and wood manufacture (excluding furniture)
- 64 Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 65 Textile yarn, fabrics, made-up articles, n.e.s., and related products
- 66 Non-metallic mineral manufactures, n.e.s.
- 67 Iron and steel
- 68 Non-ferrous metals
- 69 Manufacture of metals, n.e.s.

## **PRODUCT LIST : SITC REV.3**

### **7 Machinery and transport equipment**

- 70 Complete industrial plant appropriate to section 7
- 71 Power-generating machinery and equipment
- 72 Machinery specialized for particular industries
- 73 Metal working machinery
- 74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s
- 75 Office machines and automatic data-processing machines
- 76 Telecommunications and sound recording and reproducing apparatus and equipment
- 77 Electrical machinery, apparatus and appliances, n.e.s and electrical parts thereof (including non-electrical counterparts n.e.s of electrical household type equipment)
- 78 Road vehicles (including air-cushion vehicles)
- 79 Other transport equipment

### **8 Miscellaneous manufactured articles**

- 80 Complete industrial plant appropriate to section 8
- 81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s
- 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 Travel goods, handbags and similar containers
- 84 Articles of apparel and clothing accessories
- 85 Footwear
- 87 Professional, scientific and controlling instruments and apparatus, n.e.s
- 88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks
- 89 Miscellaneous manufactured articles, n.e.s

### **9 Commodities and transactions not classified elsewhere in SITC**

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 94 Complete industrial plant, not elsewhere specified
- 96 Coin (other than gold coin) not being legal tender
- 97 Gold, non-monetary (excluding gold, ores and concentrates)
