Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial: Bezugsdaten, bei denen die Konzepte allgemein bekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Veröffentlichungen wenden sich an eine ganz bestimmte Zielgruppe, wie zum Beispiel an den Bildungsbereich oder an Entscheidungsträger in Politik und Verwaltung. Sie enthalten ausgewählte und auf die Bedürfnisse einer Zielgruppe abgestellte und kommentierte Informationen. Eurostat übernimmt hier also eine Art Beraterrolle.

Für einen breiteren Benutzerkreis gibt Eurostat Jahrbücher und periodische Veröffentlichungen heraus. Diese enthalten statistische Ergebnisse für eine erste Analyse sowie Hinweise auf weiteres Datenmaterial für vertiefende Untersuchungen. Diese Veröffentlichungen werden in gedruckter Form und in Datenbanken angeboten, die in Menütechnik zugänglich sind.

Um Benutzern die Datensuche zu erleichtern, hat Eurostat Themenkreise, d. h. eine Untergliederung nach Sachgebieten, eingeführt. Daneben sind sowohl die Statistischen Dokumente als auch die Veröffentlichungen in bestimmte Reihen, wie zum Beispiel „Jahrbücher“, „Konjunktur“, „Methoden“, untergliedert, um den Zugriff auf die statistischen Informationen zu erleichtern.

Y. Franchet  
Generaldirektor

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well-established, standardized, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylized motif which distinguishes the statistical document from other publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well-defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in videotext databases.

To help the user focus his research, Eurostat has created 'themes', i.e. subject classifications. The statistical documents and publications are listed by series: e.g. yearbooks, short-term trends or methodology in order to facilitate access to the statistical data.

Y. Franchet  
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission européenne a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'ensemble des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, elles, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans lesquels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type vidéotex.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

Y. Franchet  
Directeur général

## EXPLANORY NOTE

### I INTRODUCTION

As part of the statistical surveys on areas under vines, this publication follows on the publication containing the data for 1979 to 1990. The figures refer to the results of the annual surveys carried out from 1990 by the seven Member States (Germany-D, Greece-EL, Spain-E, France-F, Italy-I, Luxembourg-L and Portugal-P)<sup>1</sup> obtained on the basis of intermediate surveys of holders or by processing administrative data, in accordance with Articles 5 and 6 of Council Regulation N° 357/79 (Framework Regulation on Statistical Surveys of Areas under Vines - see point 3 below for a list of all the relevant Community legislation). This information concerns the changes in the area under wine-grape vines (in the form of grubbing, planting or replanting) and the yield of this area, so as to monitor the trends in wine-producing potential and in the supply on the market in question.

When using the data from the surveys, please bear in mind that the 1994 results for Italy are still provisional.

### II SUMMARY DESCRIPTION OF ANNUAL INFORMATIONS

#### 1. Data on areas under vines

These data, on the cultivated area under wine-grape vines, are displayed not only in absolute terms but also in terms of structure, based on the unit yields of these areas.

The yield classes used to break down the areas in question can be based either on the **main yield** (see Article 6 (2) of Regulation N° 357/79) for each yield class or on the **actual yield** (see inclusion of a new Table 5 in Annex I of Decision N° 80/764/EEC).

The criterion of the main yield (i.e. the potential or average production of grape most or vine) involves attributing the basic statistical unit (the vineyard holding, department, etc.) to yield classes compiled on the basis of average production over a long period (5 or 10 years), and this position does not change during the period between basic surveys. This principle, which is based on the interpretation of the provision of Regulation N° 357/79, is difficult to apply. Consequently, each Member State has chosen a solution adapted to its situation.

With regard to the other criterion, the actual yield, i.e. the actual production in the reference year, the yield of the basic statistical unit must be calculated each year.

#### 2. Production data

As in the case of data on area (see 3.1), production data can refer either to the areas classified by potential yields or to the areas classified by actual yields recorded during the reference year.

The national production data in these tables are sometimes different from the production statistics (supply balances) sent to Eurostat. This may be due either to the fact that these surveys refer only to marketable production or to the fact that the data are obtained from different sources or by different estimating methods.

---

<sup>1</sup> Austria, which became a new wine-growing Member State in 1995, is due to communicate its wine-growing data after the 1999 basic survey.

### III PRESENTATION OF RESULTS

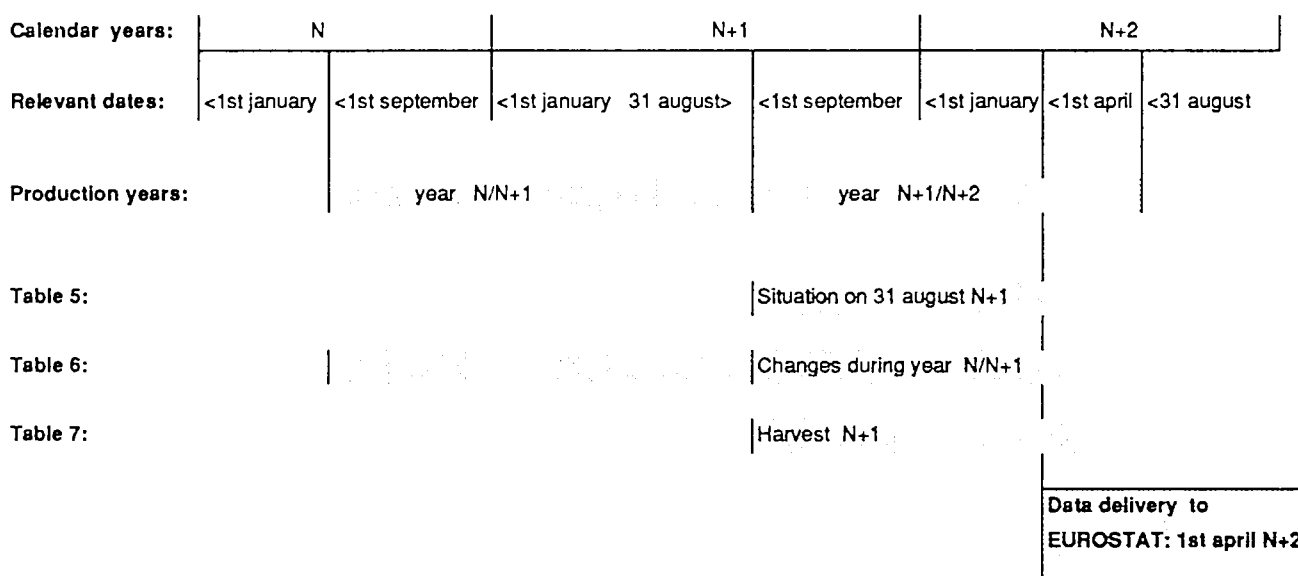

The results are presented in the form of tables (5, 6 and 7) and by wine-growing regions, according to the specific provisions of Decision N° 80/765/EEC.

In view of what has been outlined above in points 1 and 2 of section II, this publication displays a dual series of tables: those based on the potential yield of areas and those based on the actual yield of these same areas (see list of tables).

### IV AVAILABILITY OF THE DATA

#### 1. Availability dates and deadlines

The above data are sent to Eurostat annually during the first few months of the year following the reference wine-growing year, with the exception of the year following a basic survey. Ideal availability is shown in the diagram below, although it can be seen from the list of information available that this schedule is not always adhered to.

#### 2. Description of data available

In view of the possibility of collecting annual data via two approaches (see section II) and of using a certain number of methods and procedures which the Member States are free to choose, it is useful to give a brief summary of collection methods in each of the countries supplying information.

##### 2.1 Germany

The data by yield class are sorted by class of actual yield. They are made available according to the above schedule. The sorting operation takes as its basic unit the vineyard holding, and the data sources and collection methods vary according to the *Länder* concerned.

All the data are collected and checked by the *Statistische Landesämter* before transmission to the *Statistisches Bundesamt*, which in turn sends them to Eurostat.

## 2.2 Greece

The data are collected directly from agricultural holders via a sample survey. The data are also sorted by class of actual yield. They are made available according to the above schedule. The basic statistical unit is the vineyard holding.

## 2.3 France

Sorting by yield class is carried out on the basis of the potential or anticipated yield. The basic statistical unit is an administrative unit - the *Département*.

Each unit is assigned to a yield class before the data are processed in any way. The data, which are taken from administrative sources (the declarations on wine-growing potential and production), are then sorted on the basis of this classification and sent annually to Eurostat according to the schedule at the beginning of section IV. However, the data on production by production area and yield class, sent annually to Eurostat in April of year N+2, relate to the production for year N and not for year N+1.

## 2.4 Italy

From the information available on the methodology used and, in particular, the analysis of data, it can be concluded that sorting by yield class is carried out on the basis of actual yield. The basic statistical unit is the *zona agraria*, a Ministry of Agriculture division. The information is estimated using various sources and sent to Eurostat.

## 2.5 Luxembourg

The data by yield class are sorted on the basis of potential or anticipated yield. The basic statistical unit is the wine-growing area, which is divided into homogeneous zones based on the vine variety or vine-variety groupings. The information is made available within the above-mentioned deadlines but, as for France, the production data submitted (Table 7) relate to the last harvest but one.

## 2.6 Spain

The data are sorted on the basis of the two approaches, by class of potential and actual yield, the basic statistical unit being the *Province*.

## 2.7 Portugal

The data are sorted by class of potential yield, the basic statistical unit being the *Province*.

## ANNEX

### Community legislation on statistical surveys of areas under vines

- a) Council Regulation (EEC) No 357/79 of 5 February 1979 (OJ L 54 of 5 March 1979, p.124),  
as amended by:
- Act of Accession (Greece) (OJ L 291 of 19 November 1979, p.89, paragraph H.7, and p.127, paragraph E.1)
  - Council Regulation (EEC) No 1992/80 of 22 July 1980 (OJ L 195 of 29 July 1980, p.10)
  - Council Regulation (EEC) No 3719/81 of 21 December 1981 (OJ L 373 of 29 December 1981)
  - Council Regulation (EEC) No 490/86 of 23 February 1986 (OJ L 54 of 19 March 1986, p.21)
  - Council Regulation (EEC) No 3205/93 of 16 November 1993 (OJ L 289 of 24 November 1993, p.4)
- b) Council Decision 89/287/EEC of 17 April 1989 (OJ L 112 of 25 April 1989, p.18)
- c) Commission Regulation (EEC) No 991/79 of 17 May 1979 (OJ L 129 of 28 May 1979, p.1),  
as amended by:
- Commission Regulation (EEC) No 2802/85 of 7 October 1985 (OJ L 265 of 8 October 1985, p.15)
- d) Commission Decision 79/491/EEC of 17 May 1979 (OJ L 129 of 28 May 1979),  
as amended by:
- Commission Decision 85/620/EEC of 13 December 1985 (OJ L 379 of 31 December 1985, p.1)
- e) Commission Decision 80/763/EEC of 8 July 1980 (OJ L 213 of 16 August 1980, p.26)
- f) Commission Decision 80/764/EEC of 8 July 1980 (OJ L 213 of 16 August 1980)
- g) Commission Decision 80/765/EEC of 8 July 1980 (OJ L 213 of 16 August 1980, p.34),  
as amended by:
- Commission Decision 85/621/EEC of 13 December 1985 (OJ L 379 of 31 December 1985, p.12)

## ABBREVIATIONS AND CODES

### Abbreviations

ha	:	hectare
hl	:	hectolitre
D	:	Germany
E	:	Spain
EL	:	Greece
F	:	France
I	:	Italy
L	:	Luxembourg
EUR	:	European Community

### Codes

The full code for each table takes the form **XX.YY.ZZ**. Within this code, "XX" signifies the type of table, i.e.

50	:	Table 5 (Commission Regulation (EEC) No 991/79), corresponding to the "Table 5.0"
51	:	Table 5 (Commission Decision 80/764/EEC), corresponding to the "Table 5.1"
60	:	Table 6 (Commission Decision 80/764/EEC), corresponding to the "Tables 6.0"
61	:	Table 6 (Commission Decision 80/764/EEC), corresponding to the "Tables 6.1"
70	:	Corresponds to the "Table 7.0"
71	:	Corresponds to the "Table 7.1"

- "YY" signifies the geographical unit, i.e.:

03	:	Germany
04	:	Greece
05	:	Spain
06	:	France
08	:	Italy
09	:	Luxembourg
15	:	EUR 12

- "ZZ" signifies the year or wine-growing year, i.e.:

90	:	1990 or 1989/90
91	:	1991 or 1990/91
92	:	1992 or 1991/92
93	:	1993 or 1992/93
94	:	1994 or 1993/94
95	:	1995 or 1994/95

**Conversion table:  
specific weight (°Oechsle) / alcoholic strength of grape-must**

European Commission

**Areas under vines — Results of the annual surveys, 1990-95**

Luxembourg: Office for Official Publications of the European Communities

1997 — 209 pp. — 21.0 x 29.7 cm

Theme 5: Agriculture, forestry and fisheries (green)

Series C: Accounts and surveys

ISBN 92-827-9373-7

Price (excluding VAT) in Luxembourg: ECU 28

Community countries with more than 500 ha under vines are obliged to carry out a series of statistical operations to quantify their wine-growing production potential and classify their production areas.

These operations consist of a basic survey every 10 years and intermediate surveys on an annual basis. The aim of this publication is to disseminate all the data received by Eurostat from 1990 to 1995 on carrying out these intermediate surveys. Details on these figures are provided by an introductory note which also draws potential users' attention to the fact that the data are not fully harmonized between Member States.
