INDEX OF INDUSTRIAL PRODUCTION

February 1979: recovery from the downturn in January

After the downturn which occurred in January as a result of social conflicts in two large Member States and of the severe winter in the whole of Europe, Community industrial production in February 1979 returned to the level of December 1978. The seasonally adjusted Community index of industrial production as estimated by Eurostat rose to a value of 115.3, the base being 1975=100, i.e. an increase of 2.3 % as compared with January.

The largest rises in February occurred in the United Kingdom (+ 6.5 %) and Italy (+ 3.1 %). Analysis of the short-term trend for the last six months, however, indicates that growth is more regular and sustained in France and the Netherlands while it is more hesitant in Germany (see Table II, % A).

The salient feature in the analysis by branch group remains the sluggishness of capital goods production in virtually all the countries, but especially in Germany and France. In February 1979 production of capital goods in the Community fell to the same level as one year before after a very slight improvement in the autumn of 1978.

HINWEISE

1. Bedeutung der Wachstumsraten A und B

| | A | B |
|-------------------|---|--|
| arbeitstglich : | die letzten 12 Monate gegenüber den vorhergehenden 12 Monaten | der letzte Monat gegenüber dem entsprechenden Vorjahresmonat |
| saisonbereinigt : | die letzten 3 Monate gegenüber den vorhergehenden 3 Monaten | der letzte Monat gegenüber dem Vormonat |

2. Methodologische Erläuterungen zu den Tabellen sind in Beilagen zum Monatsbulletin veröffentlicht.

3. Fragen zu dieser Veröffentlichung zu richten an : Melle Primard, Tel. 43011, App. 3264 in Luxemburg.

NOTES

1. Significance of growth rates A and B

| | A | B |
|-----------------------|---|---|
| per working day : | last 12 months with respect to preceeding 12 months | latest month with respect to the corresponding month of the previous year |
| seasonally adjusted : | last 3 months with respect to the preceeding 3 months | latest month with respect to the previous month |

2. Methodological notes relative to the tables are published as supplements to the monthly bulletin.

3. For any further information about this publication contact Melle Primard, tel. 43011, ext. 3264 in Luxemburg.

NOTES

1. Signification des taux d'accroissement A et B

| | A | B |
|---------------------|---|--|
| par jour ouvrable : | 12 derniers mois par rapport aux 12 mois précédents | dernier mois par rapport au mois correspondant de l'année précédente |
| désaisonnalisés | 3 derniers mois par rapport aux 3 mois précédents | dernier mois par rapport au mois précédent |

2. Les notes méthodologiques relatives aux tableaux sont publiées dans des suppléments au bulletin mensuel.

3. Pour toute information concernant cette publication, s'adresser à Melle Primard, tél. 43011, ext. 3264 à Luxembourg.

Diese Graphik stellt für die Gemeinschaft als Ganzes den Verlauf des Beschäftigungsindex (1975=100) für die gesamte Industrie, die Metallherzeugung (NACE 22) und zwei metallverbrauchende Produktionsbereiche, den Maschinenbau (NACE 32) und den Kraftwagenbau (NACE 35), vergleichend dar (s. auch Seite 5, graphische Darstellung des Index der industriellen Produktion für die gleichen Produktionsbereiche). Während die Entwicklung beim Maschinenbau seit 1975 relativ stetig verläuft, ist die Beschäftigung in der Metallherzeugung um 10 % gesunken und im Kraftwagenbau um etwa 16 % gestiegen. Vergleichsweise ist im gleichen Zeitraum die Produktion bei der Metallherzeugung um 10 % und beim Kraftwagenbau um rd. 20 % gestiegen.

This graph compares the movement of the employment indices (1975=100) at Community level for total industry, metals production (NACE 22) and two metal-consuming branches: mechanical engineering (NACE 32) and manufacture of motor vehicles (NACE 35) (see also page 5, graph of production index for the same branches). While the index for mechanical engineering is fairly stable since 1975, employment has dropped by about 10 % in production of metals and has increased by about 16 % in motor vehicle manufacture. This may be compared with a production increase of 10 % for metals production and about 20 % for motor vehicles during the same period.

Ce graphique montre, au niveau communautaire, l'évolution comparée des indices (1975=100) de l'emploi dans l'ensemble de l'industrie, dans la production de métaux (NACE 22) et dans deux branches consommatrices de métaux : la construction de machines (NACE 32) et la construction d'automobiles (NACE 35) (voir également page 5 le graphique de l'indice de production pour les mêmes branches). Alors que dans la construction de machines, l'évolution est relativement stable depuis 1975, l'emploi a décliné d'environ 10 % dans la production de métaux et augmenté d'environ 16 % dans la construction automobile. À titre de comparaison, la production a augmenté de 10 % dans la production de métaux et d'environ 20 % dans la construction automobile pendant la même période.
