Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

WECHSELKURSE: Dollarschwäche nach dem Ende der Krise in Rußland

Nachdem die Krise in Rußland Anfang Oktober beendet werden konnte, setzte sich der bereits vor der Krise beobachtete kontinuierliche Wertverlust des US-Dollars gegenüber der D-Mark fort. Am 12. Oktober lag der Kurs der amerikanischen Währung bei 1,596 DM für 1 USD und damit um 5 Pfennige unter seinem in der letzten Septemberwoche erreichten Höchststand.

Als Folge der starken Verfassung der D-Mark gegenüber dem Dollar erhöhte sich auch der Wert der deutschen Währung gegenüber den übrigen am Wechselkursmechanismus teilnehmenden Währungen. Der Kurs der D-Mark gegenüber dem französischen Franc stieg auf über 3,50 FF, nachdem er zehn Tage lang unter dieser Marke gelegen hatte, und gegenüber dem belgischen Franc und dem irischen Pfund gewann die D-Mark ebenfalls an Wert.

Die italienische Lira und das Pfund Sterling, die beide vor gut einem Jahr aus dem Wechselkursmechanismus ausschieden, befanden sich in jüngster Zeit gegenüber der D-Mark ebenfalls in einer relativ schwachen Verfassung. Der Kurs des Pfund Sterling hat jetzt wieder seinen Stand von Anfang Juni erreicht, nachdem er im Sommer lange Zeit bei über 2,50 DM gelegen hatte; die Lira hat dagegen gegenüber der D-Mark seit Ende Juni, als ihr Kurs bei rund 900 LIT für 1 DM lag, kontinuierlich an Wert verloren, so daß jetzt fast die Marke von 1.000 LIT für 1 DM erreicht ist.

Demgegenüber konnte sich die dänische Krone gegenüber der D-Mark behaupten und sogar leicht verbessern. Am 24. September und am 11. Oktober senkte die dänische Zentralbank ihre Leitzinsen jeweils um 0,5 %, ohne daß der Kurs der Krone maßgeblich nachgab. Der dänische Diskontsatz liegt jetzt bei 7,75 % und ist damit nur wenig höher als vor Beginn der Wechselkursspannungen dieses Sommers.

Gegenüber dem Yen konnte sich der US-Dollar behaupten; Mitte Oktober wurde er weiterhin zu rund 105 Y gehandelt.

RENDITEN VON STAATSANLEIHEN: Renditerückgang in Spanien und Irland

Obwohl in diesem Monat nur wenig neue Daten vorliegen, lassen die verfügbaren Daten doch erkennen, daß die Renditen von spanischen Staatsanleihen im September weiter rückläufig waren und auf unter 9 % zurückgingen. Im Oktober 1992 hatten sie 13,6 % betragen. Die spanische Inflationsrate war zwar in jüngerer Zeit leicht rückläufig, doch steht außer Zweifel, daß die realen (Inflationsbereinigten) langfristigen Zinsen in Spanien ebenfalls deutlich gesunken sind.

Ein Renditerückgang war darüber hinaus in Irland (von 7,7 % im Juli auf 7,2 % im August) sowie im September im Vereinigten Königreich festzustellen.

In Belgien zogen die Renditen von Staatsanleihen dagegen im September leicht an, womit sie sich seit Februar dieses Jahres zum erstenmal gegenüber dem Vormonat erhöhten. Die kurzfristigen Zinsen sind in Belgien allerdings weiterhin deutlich höher als Anfang des Jahres.

Gegenüber dem Vormonat unverändert waren die Renditen im September mit rund 6,6 % in Dänemark und Luxemburg.

GELDVOLUMEN: M3-Zuwachsrate in Frankreich weiterhin unterhalb des Zielkorridors

Die M3-Zuwachsrate lag in Frankreich im Juli, auf Jahresbasis umgerechnet, bei weniger als 1 % und damit deutlich unterhalb der für 1993 vorgegebenen 4 %-6,5 %. Damit hat sich das Geldmengenwachstum im Vergleich zum Vormonat zum viertenmal hintereinander verlangsamt, wobei diese Verlangsamung im Juli allerdings zum Teil darauf zurückzuführen war, daß Mittel aus kurzfristigen Einlagen, die in die Geldmenge eingehen, abgezogen und zum Erwerb von Schuldverschreibungen der Regierung „Balladur“ verwendet wurden.

In Italien hat sich das Geldmengenwachstum dagegen weiter beschleunigt. Mit 7,8 % lag die auf ein Jahr umgerechnete M2-Zuwachsrate im August oberhalb der angestrebten 5 %-7 %.

In den Vereinigten Staaten weitete sich M2 weiterhin langsam aus, allerdings betrug die Zuwachsrate im Juni zum zweitenmal hintereinander mehr als 1 %.

AMTLICHE WÄHRUNGSRESERVEN: Im August deutlicher Anstieg der Währungsreserven in Deutschland und den Niederlanden

Die deutschen und die niederländischen Währungsreserven erhöhten sich im August um 34 % bzw. 15 %, nachdem die Zentralbanken beider Länder Ende Juli an den Devisenmärkten interveniert hatten, als andere am Wechselkursmechanismus teilnehmende Währungen unter Druck geraten waren. Die deutschen Währungsreserven beliefen sich auf derzeit auf über 90 Mrd. ECU und haben damit ihr Rekordvolumen von September 1992 überschritten.

Diesem Anstieg der deutschen Reserven stehen Reservenabflüsse aus anderen Ländern gegenüber. Dies gilt insbesondere für Dänemark, dessen Währungsreserven im August um 21 % zurückgingen, nachdem sie sich im Juli erhöht hatten. In Belgien, Spanien und Irland waren ebenfalls Reservenabflüsse zu verzeichnen, wobei die irischen Reserven allerdings weiterhin mehr als doppelt so hoch sind wie Anfang des Jahres, da sie sich bis Ende Juli kontinuierlich erhöht hatten.

In Japan kam es im Juli ebenfalls zu einem Anstieg der Währungsreserven, die gegenwärtig mit mehr als 85 Mrd. ECU ihren höchsten Stand seit Mai 1989 erreicht und sich seit Anfang 1993 um fast 43 % erhöht haben. Dieser Anstieg ist die Folge der starken Verfassung der japanischen Währung, die die Bank of Japan veranlaßte, den Yen-Dollar-Wechselkurs, der sich Mitte August auf die Marke von 100 Y für 1 USD zubewegte, durch Interventionen an den Devisenmärkten zu stützen.

VIERTELJÄHRLICHE GESAMTRECHNUNGEN: Im ersten Quartal 1993: Rückläufiges Wirtschaftswachstum (BIP - 0,9 %), Wiederanstieg der Inflation (+0,8 %)

Im ersten Quartal 1993 war für die Wirtschaft in der Gemeinschaft insgesamt ein weiterer Wachstumsrückgang zu verzeichnen (BIP - 0,9 %). Dieses Ergebnis, das weitgehend mit den makroökonomischen Vorausschätzungen für das Jahr 1993 übereinstimmt, läßt vermuten, daß sich die wirtschaftliche Lage im Laufe des Jahres noch ungünstiger als 1992 entwickeln wird. Den meisten Wirtschaftswissenschaftlern

zufolge sind nur schwer Anzeichen für eine kurzfristige Erholung der Wirtschaft in der Gemeinschaft festzustellen. Dagegen läßt die amerikanische Wirtschaft gewisse – zwar relativ schwache und zuweilen widersprüchliche – Anzeichen für einen Aufschwung erkennen. Völlig offen bleibt jedoch zur Zeit die Frage, inwieweit die Volkswirtschaften der Gemeinschaft angesichts ihrer internen Probleme von diesem neuen Aufwärtstrend in den Vereinigten Staaten profitieren können. Auf der letzten Konferenz der G-7 wurde betont, daß der Aufschwung der Weltwirtschaft von drei Hauptfaktoren abhängt: dem Wiederaufschwung des Außenhandels, der eng verbunden ist mit der positiven Entwicklung der GATT-Verhandlungen; der Wiederbelebung der Inlandsnachfrage, vor allen nach Gütern des letzten Verbrauchs; dem Abbau der staatlichen Defizite in allen Ländern. Für die Gemeinschaft ist außerdem ein Abbau der monetären Spannungen zu nennen, die sich auf die Stabilität des monetären Systems sehr ungünstig ausgewirkt haben. Im ersten Quartal des laufenden Jahres sind die Zinssätze dank der nachlassenden Spannung auf dem Devisenmarkt und des geringeren Inflationsdrucks langsam gesenkt worden, was vor allem dem Zweck diente, die Inlandsnachfrage zu fördern.

Was die anhand des impliziten BIP-Deflators gemessene Preisentwicklung betrifft, so ist ein leichtes Wiederansteigen der vierteljährlichen Inflationsrate (+0,8 %) festzustellen, während die jährliche Rate weiterhin rückläufig ist (+3,0 %). Diese günstige Preisentwicklung ist zweifellos durch die schwache Inlandsnachfrage beeinflußt worden, die selbst in den Ländern, in denen Abwertungen vorgenommen wurden, dazu geführt hat, daß die Inflationsrate weiter gesunken ist.

Bei den Bestandteilen des BIP muß auf den vierten aufeinanderfolgenden und bisher stärksten Rückgang der Investitionstätigkeit (-2,4 %) hingewiesen werden. Die Entwicklung des privaten ebenso wie des öffentlichen Verbrauchs ist ebenfalls negativ (-0,8 % bzw. 0,6 %).

Was die Situation in den einzelnen Mitgliedstaaten angeht, ist eine Verschärfung der negativen Phase in den Niederlanden (BIP -0,5 %), in Frankreich (BIP -0,7 %), in Dänemark (BIP -1,6 %) und vor allem in Deutschland (BIP -2,3 %) zu beobachten. In Italien scheint sich die Rezessionstendenz, die in den letzten drei Quartalen festzustellen war, zu verlangsamen (BIP -0,1 %). Nur in einem Land, im Vereinigten Königreich, ist eine positive Entwicklung mit mäßiger Steigerungsrate zu verzeichnen (BIP +0,4 %). Was die Inflation betrifft, wird ein deutlicher Rückgang aus Italien (+0,7 %) und vor allem aus Deutschland (+0,2 %) gemeldet. Dagegen hat sich in Frankreich der Inflationsdruck verschärft (+1,1 %), ebenso wie im Vereinigten Königreich und in Dänemark (+1,2 % bzw. +1,3 %), vor allem, wenn man berücksichtigt, daß in diesen beiden Staaten im vierten Quartal 1992 eine relativ starke Deflation zu beobachten war. Für Frankreich und die Niederlande weisen die vorläufigen Daten für das zweite Quartal 1993 auf eine Stagnation der Produktion hin (BIP -0,0 % bzw. +0,0 %).

Für die Vereinigten Staaten liegen bereits die Zahlen für das zweite Quartal 1993 vor. Dort ist ein leichter Anstieg des Wirtschaftswachstums (BIP +0,4 %) bei einem gleichzeitigen leichten Rückgang der vierteljährlichen wie jährlichen Inflationsrate (+0,6 % bzw. +2,5 %) zu beobachten. Bei den Komponenten des BIP ist die anhaltende positive Entwicklung der Investitionstätigkeit (+1,7 %) sowie der Wiederanstieg des privaten Verbrauchs (+0,9 %) zu nennen.

In Japan deuten die Zahlen für das zweite Quartal 1993 auf ein Anhalten der Phase der Unsicherheit hin: Die Produktion ist erneut zurückgegangen (BIP -0,5 %) und die vierteljährliche Inflationsrate ist erheblich gestiegen, wohingegen die jährliche Inflationsrate rückläufig ist (+0,7 %). Bei den Komponenten des BIP ist ein Rückgang des privaten Verbrauchs (-0,6 %) und der Investitionstätigkeit (-0,3 %) festzustellen.

PREISE : Die Jahresinflationsrate der EG fällt auf 3,3 % in September

Die Jahresinflationsrate der EG, gemessen mit dem Verbraucherpreisindex, fiel von 3,4 % (****) in August auf 3,3 % in September; dies ist die niedrigste Rate seit Mai 1988. Vor Jahresfrist betrug diese Zahl 4,0 %.

In aufsteigender Reihenfolge geordnet nach der derzeitigen Inflation sind die Raten der einzelnen Mitgliedstaaten für diese Zeiträume wie folgt:

	SEPT. '93	SEPT. '92	SEPT. '93	SEPT. '92	SEPT. '93	SEPT. '92
	SEPT. '93	SEPT. '92	SEPT. '93	SEPT. '92	SEPT. '93	SEPT. '92
Dänemark	1,2 %	2,0 %	Luxemburg	3,7 %	3,0 %	
Irland**	1,3 %	2,8 %	Deutschland*	4,0 %	3,6 %	
Niederlande	1,8 %	3,5 %	Spanien	4,3 %	5,8 %	
Ver. Königreich	1,8 %	3,6 %	Italien	4,4 %p	4,8 %	
Frankreich	2,3 %	2,1 %	Portugal	5,9 %	9,3 %	
Belgien	2,8 %	2,3 %	Griechenland	12,8 %	15,3 %	

Dieser Vergleich zeigt, daß die Inflationsraten für die letzten 12 Monate in den meisten Ländern der EG unter denen der Vergleichsperiode des Vorjahrs lagen.

Ausnahmen bilden Deutschland, Frankreich, Belgien und Luxemburg, wo die Inflation während der letzten 12 Monate höher war als im Vorjahr.

Die entsprechenden Zahlen für die Vereinigten Staaten und Japan liegen bei 2,7 % bzw. 1,5 %.

Während den ersten 9 Monaten dieses Jahres stieg der Verbraucherpreisindex für die Gemeinschaft insgesamt um 2,7 % (September 1993 gegenüber Dezember 1992); in dem entsprechenden Zeitraum des Vorjahrs lag diese Zahl bei 3,0 %.

Zwischen August und September stieg der Monatsindex für EUR-12, wegen niedriger und gemäßigter Zuwachsrate in der Mehrheit der Mitgliedstaaten, um 0,3 % an: Deutschland, Italien und Luxemburg 0,1 %, Dänemark und Portugal 0,3 %, Frankreich, das Vereinigte Königreich und die Niederlande 0,4 % und Spanien 0,6 %. Der belgische Index fiel wegen Preisrückgängen für Obst, Gemüse und Kartoffeln um 0,2 %.

Der griechische Index dagegen verzeichnete einen starken Anstieg vom 2,5 % als Folge von scharfen Preissteigerungen in fast allen Verbrauchssektoren, aber insbesondere für Bekleidung und Schuhe (8,1 %), dauerhafte Gebrauchsgüter (8,3 %) sowie für Bildung und Freizeit (3,8 %).

Der vierteljährige Index für Irland stieg zwischen Mitte Mai und Mitte August um 1,0 %, d.h. etwa 0,3 % pro Monat.

* Der Verbraucherpreisindex der Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3. Oktober 1990

** August Zahlen

*** Die Reihen für Italien wurden revidiert, was in gewissen Monaten auch eine Änderung der Angaben für EUR 12 nach sich zieht

p = Vorläufig

ARBEITSLOSIGKEIT IN DER EG

Eurostat schätzt die saisonbereinigte Arbeitslosenquote in der Gemeinschaft für September 1993 auf 10,6 %. Sie liegt damit um 0,1 Prozentpunkt höher als im Vormonat. Im Laufe der drei Sommermonate ist die Arbeitslosenquote in der Gemeinschaft nicht gestiegen. Trotzdem ergibt sich eine deutliche Erhöhung für die letzten zwölf Monate (+1,1 Prozentpunkte, von 9,5 % auf 10,6 %).

Im Vergleich zum Monat September 1992 hat die Arbeitslosenquote in fast allen Mitgliedsländern zugenommen, mit Ausnahme vom Vereinigten Königreich und Irland. Die stärksten relativen Zunahmen zeigen sich in Spanien (+3,1 Punkte, von 18,3 % auf 21,4 %), in Belgien (+1,4 Punkte, von 8,3 % auf 9,7 %), in Deutschland (+1,3 Punkte, von 4,6 % auf 5,9 % in den alten Ländern). In Dänemark (+1,0 Punkte, von 9,6 % auf 10,6 %) und in Frankreich (+0,9 Punkte, von 10,1 % auf 11,0 %). Die Arbeitslosenquote der Frauen in der Gemeinschaft insgesamt ist seit Juni 1993 unverändert (12,2 %). Im gleichen Zeitraum hat die Arbeitslosenquote der Männer leicht zugenommen (+0,1 Punkte, von 9,3 % auf 9,4 %).

In den vergangenen zwölf Monaten ist in Spanien die Zuwachsrate bei den Jugendlichen gestiegen (+4,2 Punkte, von 32,8 % auf 37,0 %) und in Belgien um (+2,3 Punkte, von 17,5 % auf 19,8 %). In Irland hingegen hat diese Quote abgenommen (-1,5 Punkte, von 28,4 % auf 26,9 %), ebenfalls im Vereinigten Königreich (-0,1 Punkte, von 15,3 % auf 15,2 %).

Diese Schätzung der Arbeitslosenquoten und der Zahl der Arbeitslosen schaltet die unterschiedlichen nationalen Methoden zur Erfassung der Arbeitslosigkeit weitgehend aus.

Die Arbeitslosenquoten werden geschätzt durch Extrapolation der 1991er Ergebnisse der EG-Arbeitskräfteerhebung in allen Mitgliedstaaten. Die Einbeziehung der 1992er Ergebnisse, sobald verfügbar, kann zu Revisionen der Schätzungen führen.

Die Einbeziehung von Ergebnissen der vierteljährlichen Arbeitskräfteerhebung für das Vereinigte Königreich hat zu einer stärkeren Revision der früher veröffentlichten Daten geführt.

INDUSTRIEPRODUKTION: Durststrecke hält an

Im Industriesektor Europas fällt die Produktion weiterhin, eine Stabilisierung ist nicht in Sicht, wobei diese Diagnose für alle Güterbereiche der Industrie gilt. Auch der Bausektor der EG zeigt konjunkturelle Schwächen.

Für die Europäische Gemeinschaft [EUR12] betrug die Veränderungsrate des arbeitstäglich bereinigten Produktionsindex der Industrie gegenüber dem Wert des gleichen Monats ein Jahr zuvor im Juli 1993 -4,5 %, im Juni waren es -4,2 %. Für die Investitionsgüterindustrie beträgt die entsprechende Veränderungsrate im Juli -5,7 %.

Betrachtet man die letzten drei verfügbaren Monate Mai bis Juli 1993, so beläuft sich für EUR12 die Veränderungsrate des saisonbereinigten Produktionsindex gegenüber den drei davor liegenden Monaten Februar bis April auf -1,0 %.

In Japan ist die Rezession noch stärker ausgeprägt, hier beträgt die entsprechende Veränderungsrate -2,4 %. In den USA ist mit +0,2 % eher Stagnation zu verzeichnen.

Im Baugewerbe [NACE 5] der Europäischen Gemeinschaft haben sich die Hoffnungen auf eine Erholung nicht bewährt: im ersten Quartal 1993 war eine Veränderungsrate von -6 % gegenüber dem letzten Quartal des Vorjahrs zu verzeichnen, die [geschätzt] Veränderungsrate im zweiten Quartal gegenüber Januar bis März beträgt -1 %.

Für die einzelnen Mitgliedstaaten der EG ergeben sich für die saisonbereinigte Industrieproduktion folgende Veränderungsraten der letzten drei Monate gegenüber den Vormonaten: Griechenland +1,1 %, Irland +1,0 % [geschätzt], Vereinigtes Königreich +0,8 %, Italien -0,1 %, Niederlande -0,6 %, Belgien -0,6 % [geschätzt], Deutschland [West] -1,0 %, Frankreich -1,5 % [geschätzt], Dänemark -3,0 % [geschätzt]. Demnach sank auch in den Sommermonaten in vielen Mitgliedstaaten die Produktion oder sie stagnierte bei geringen positiven Änderungsraten. Von den grossen EG Mitgliedsstaaten zeigt nur das Vereinigte Königreich Zeichen eines tragenden Aufschwungs.

In den einzelnen Wirtschaftszweigen der EG-Industrie sank die Produktion in der Herstellung von Metallwaren [NACE 31], der Nahrungsmittelindustrie [NACE 41/42], der Textilindustrie [NACE 43] und der Schuh- und Bekleidungsindustrie [NACE 45]. Eine leichte Erholung ist zu verzeichnen in der Erzeugung von Metallen [NACE 22], der Industrie Steine - Erden [NACE 24] und der Automobilindustrie [NACE 35], letztere allerdings nur auf Grund der Veränderungsrate von +6,7 % im Vereinigten Königreich [Deutschland -1,3 %, Italien -2,3 %, Frankreich -2,4 %].

ZAHLUNGSBILANZ – Gesamtrenden – vorläufige Zahlen für das erste Quartal 1993:

Bedingt durch die Einführung von INTRASTAT, dem neuen System für die Erhebung von Daten über den innergemeinschaftlichen Handel, ist es zu erheblichen Verzögerungen bei der Datensammlung gekommen. Infolgedessen konnten die Zahlungsbilanzdaten für das erste Quartal 1993 nicht aktualisiert werden.

Die Angaben stimmen daher bis auf einige von den Mitgliedstaaten selbst vorgenommene Änderungen mit den in der vorhergehenden Nummer veröffentlichten Zahlen überein. Bis heute (29. September 1993) liegen uns die Zahlen für die Vereinigten Staaten, Japan,

Dänemark, Deutschland, das Vereinigte Königreich und teilweise für die Niederlande und Griechenland vor, die zur Information veröffentlicht werden. Schätzungen für die gesamte Gemeinschaft für das erste Quartal 1993 sind jedoch nicht möglich.

AUSSENHANDEL

Das kumulierte Defizit des Handels der Gemeinschaft mit Drittländern belief sich in den ersten vier Monaten des Jahres 1993 auf 14,4 Mrd. ECU und war damit um 11 Mrd. ECU niedriger als im gleichen Vorjahreszeitraum. Die Differenz zwischen der Veränderungsrate der Ausfuhren und der Einfuhren betrug in den ersten vier Monaten des Jahres 1993 fast 7 Prozentpunkte. Die Einfuhren der Gemeinschaft aus Drittländern gingen gegenüber dem gleichen Vorjahreszeitraum um 4,5 % zurück, die Ausfuhren der EGweiteten sich dagegen leicht aus (+2,4 %).

Das Handelsbilanzdefizit der Vereinigten Staaten stieg zwischen den ersten vier Monaten des Jahres 1992 und dem gleichen Zeitraum des Jahres 1993 von 11,6 Mrd. ECU auf 30,6 Mrd. ECU. Während die Einfuhren und die Ausfuhren der Vereinigten Staaten, ausgedrückt in Ecu, in den ersten vier Monaten des Jahres 1992 etwa im gleichen Umfang zugenommen hatten, entwickelten sie sich im Zeitraum Januar-April 1993 unterschiedlich. Einem Anstieg der Einfuhren um 15,6 % in Ecu und um 10,3 % in US-Dollar stand eine Zunahme der Ausfuhren um 8,3 % in Ecu und um 3,3 % in Dollar gegenüber.

Der Überschuss des japanischen Außenhandels betrug im Zeitraum Januar-April 1993 mehr als 34 Mrd. ECU, gegenüber 26,9 Mrd. ECU im gleichen Zeitraum des Vorjahrs. Während sich die Ausfuhren Japans zwischen den ersten vier Monaten des Jahres 1992 und dem gleichen Zeitraums des Jahres 1993 in Ecu um 11,6 % und in Dollar um 6,4 % ausweiteten, gingen sie in Yen um 1 % zurück. Die Einfuhren Japans nahmen in Ecu um 5,1 % zu, blieben in Dollar konstant und verringerten sich in Yen um 6 %.

Der Extra-EG-Handel Deutschlands schloss in den ersten vier Monaten des Jahres 1993 mit einem Überschuss von 4,5 Mrd. ECU ab, das sind 3,3 Mrd. ECU mehr als im gleichen Zeitraum des Jahres 1992. Dänemark und Italien erzielten einen Überschuss von 0,7 Mrd. ECU bzw. 0,6 Mrd. ECU, was im Falle Italiens einer Verbesserung um 3 Mrd. ECU entspricht. Während der Extra-EG-Handel Irlands im Zeitraum Januar-April 1993 ausgeglichen war, wies die portugiesische Handelsbilanz ein Defizit von 0,8 Mrd. ECU auf. Der Extra-EG-Handel Griechenlands und der BLWU schloss mit einem Negativsaldo von jeweils 1,3 Mrd. ECU ab, was im Falle der BLWU einer Verbesserung um 1,6 Mrd. ECU gegenüber den ersten vier Monaten des Jahres 1992 entspricht. Das Defizit des spanischen Handels mit Nicht-EG-Ländern ging zwischen den ersten vier Monaten des Jahres 1992 und dem gleichen Zeitraum des Jahres 1993 um 2,6 Mrd. ECU auf rund 2 Mrd. ECU zurück. Der Negativsaldo Frankreichs stieg dagegen um 1,6 Mrd. ECU auf 2,6 Mrd. ECU. Die Bilanz des Extra-EG-Handels der Niederlande wies ein Defizit von fast 5 Mrd. ECU auf, was einer Verbesserung um 1,3 Mrd. ECU entspricht. Das höchste Defizit im Handel mit Nicht-EG-Ländern verzeichnete das Vereinigte Königreich: mit 7,6 Mrd. ECU war es um 0,4 Mrd. ECU niedriger als den ersten vier Monaten des Jahres 1992.

Hinweis: Bei den Ergebnissen des innergemeinschaftlichen Handels der BLWU, Dänemarks, Deutschlands, Irlands, der Niederlande, Portugals und des Vereinigten Königreichs handelt es sich um vorläufige Werte, die auf von den Mitgliedstaaten übermittelten Daten basieren.

Aufgrund der seit 1. Januar 1993 geänderten Datenerhebung ist bei Vergleichen zwischen dem ersten Quartal 1992 und dem ersten Quartal 1993 eine gewisse Vorsicht geboten. Die seit dem 1. Januar 1993 eingetretene Verschiebung der Erhebungstischdaten kann zur Folge haben, daß für das erste Quartal 1993 ein Rückgang der Handelsströme ausgewiesen wird. Die Tatsache, daß die Daten über den Erwerb (-16,3 %) eine andere Entwicklung des innergemeinschaftlichen Handels erkennen lassen als die Daten über die Lieferungen (-11,3 %), gibt Anlaß zur Vorsicht.

Demnach wäre der innergemeinschaftliche Erwerb zwischen dem ersten Quartal 1992 und dem ersten Quartal 1993 um 16,3 % und damit deutlicher zurückgegangen als die Einfuhren aus Drittländern (-4,8 %). Die innergemeinschaftlichen Lieferungen hätten im gleichen Zeitraum um 11,3 % abgenommen, während die Ausfuhren in Drittländer um 1,3 % zugenommen haben.

Den höchsten Überschuß im innergemeinschaftlichen Handel erzielten im ersten Quartal 1993 die Niederlande: mit 5,9 Mrd. ECU war er um 1,2 Mrd. ECU höher als im gleichen Vorjahreszeitraum. Der Intra-EG-Handel der BLWU, des Vereinigten Königreichs und Italiens schloß mit einem Positivsaldo zwischen 1 Mrd. ECU und 1,5 Mrd. ECU ab, was gegenüber den ersten drei Monaten des Jahres 1992 einer Verbesserung um 2,2 Mrd. ECU, bzw. 2,7 Mrd. ECU und 4 Mrd. ECU entspricht. Irland und Dänemark erzielten im innergemeinschaftlichen Handel im ersten Quartal 1993 einen Überschuß von 1 Mrd. ECU bzw. 0,8 Mrd. ECU und damit in etwa das gleiche Ergebnis wie im entsprechenden Zeitraum des Vorjahrs. Die französische Bilanz des Intra-EG-Handels war im ersten Quartal 1993 ausgeglichen, nachdem sie in den ersten drei Monaten des Jahres 1992 mit einem Defizit von 1,2 Mrd. ECU abgeschlossen hatte. Deutschland erzielte im Handel mit den übrigen EG-Ländern im Zeitraum Januar-März 1993 mit einem Defizit von 0,6 Mrd. ECU ein um 3,2 Mrd. ECU schlechteres Ergebnis als im entsprechenden Vorjahreszeitraum. Dagegen verringerte sich der Negativsaldo des innergemeinschaftlichen Handels Spaniens um fast 2 Mrd. ECU auf 0,8 Mrd. ECU. Der Intra-EG-Handel Portugals schloß im ersten Quartal 1993 in etwa mit dem gleichen Ergebnis (-1,4 Mrd. ECU) ab wie im entsprechenden Zeitraum des Jahres 1992. Das höchste Defizit im innergemeinschaftlichen Handel verzeichnete in den ersten drei Monaten des Jahres 1993 Griechenland: mit 2,2 Mrd. ECU war es um 0,8 Mrd. ECU höher als im gleichen Vorjahreszeitraum.

Foreword

EN

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (the notes regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Further information on *Eurostatistics* can be obtained from the following addresses:

Unless otherwise stated, data for the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

EXCHANGE RATES: dollar weakens on resolution of Russian crisis

The US dollar returned to its earlier position of steady depreciation against the Deutsche-mark following the resolution of the Russian crisis in early October. By October 12, it stood at DM 1.596, some 5 pfennigs lower than its recent peaks in the last week of September.

The Deutsche-mark's recent strength against the dollar had the effect too of strengthening it against the other exchange rate mechanism (ERM) currencies. It rose above FF 3.50 after ten days when it traded below that point, and also rose against the Belgian franc and the Irish pound.

The Italian lire and sterling, which both left the ERM just over a year ago, have also both recently been fairly weak against the mark. Sterling now stands at its levels of the beginning of June, having traded at above DM 2.50 for much of the summer, whilst the lire has depreciated steadily against the mark since the end of June, from levels of around LIT 900 to the mark to its current value of almost LIT 1000.

The Danish krone however has been stable against the DM and has even appreciated slightly. The Danish central bank reduced its headline interest rates on September 24 by 0.5% and again on October 11 by the same amount, without any real depreciation of the krone. The discount rate now stands at 7.75%, only slightly above the levels that existed before the summer exchange rate pressures.

The US dollar has maintained its position against the Japanese yen and by the middle of October continued to trade at around 105 against the dollar.

GOVERNMENT BOND YIELDS: Yields fall in Spain and Ireland

Although there are little new data available this month, data that are available indicate a continued fall in the yield on Spanish government bonds, down below 9% in September. In October 1992 the yield was 13.6%. Although the Spanish inflation rate has recently fallen slightly, it is clear that there has also been a large fall in the level of real (inflation-adjusted) long-term interest rates in Spain.

Yields fell also in Ireland, where in August they stood at 7.2%, down from 7.7% in July, and in the UK in September.

In Belgium however the yield on government bonds increased slightly in September, the first monthly rise since February of this year. It should be noted however that short-term interest rates in Belgium remain significantly higher than earlier in the year.

Yields remained unchanged on a monthly basis in September in Denmark and Luxembourg; in both countries they stand at around 6.6%.

MONEY SUPPLY: French M3 growth continues to be below target range

The growth rate of M3 in France grew by less than 1% in the 12 months to July, well below its 1993 target range for growth of 4-6.5%. This is the fourth consecutive month of slowing growth, although a part of the slowdown in July was due to funds being switched out of short-term deposits which are included in the monetary aggregates into the purchases of the 'Balladur' government bond issue.

In contrast, monetary growth in Italy continues to quicken: M2 growth in the 12 months to August was 7.8%, above the upper limit of its target range of 5-7%.

M2 growth in the United States continues to be slow, but it was above 1% in June for the second successive month.

FOREIGN OFFICIAL RESERVES: large inflows into Germany and the Netherlands in August

Germany and the Netherlands reserves increased by 34 and 15% respectively during August, following the foreign exchange market intervention undertaken by both countries' central banks during the period at the end of July when other ERM currencies were under pressure. Germany's reserves now stand at over 90 billion ecu, higher than their previous peak in September 1992.

The reverse side of these inflows can be seen in outflows in reserves from other countries, particularly Denmark, which lost 21% of its reserves in August following the increase in July. Belgium, Spain and Ireland also experienced outflows of reserves, although in the case of Ireland its reserves remain over twice as large as at the beginning of the year, having increased steadily up to the end of July.

Japan also experienced inflows of reserves in July; its reserves now stand at over 85 billion ecu, their highest level since May 1989, and are almost 43% higher than at the start of 1993. This increase has come about due to the strength of the Japanese yen: the Bank of Japan has been intervening to support the yen-dollar exchange rate, which was approaching 100 in the middle of August.

QUARTERLY ACCOUNTS: In the first quarter of 1993: economic growth declined (GDP -0.9%) and inflation resumed (+0.8%)

The first quarter of 1993 saw another decline in economic growth in the Community economy as a whole (GDP -0.9%). This result is in line with macroeconomic forecasts for 1993 and presages an even less favourable economic situation throughout the current year than in 1992. Most economists agree that it is very difficult to pinpoint any signs of short-term recovery in the Community economy. However, signs of recovery, although relatively weak and occasionally contradictory, are discernible in the American economy. The real unknown factor at this stage is the capacity of the Community economies, given their internal problems, to profit from this new economic trend in the United States. As underlined at the last G7 meeting, world economic recovery is linked to three main factors: a recovery in external trade, closely linked to a positive outcome of the GATT negotiations; a recovery in domestic demand, particularly in terms of final consumption; and a reduction in the primary public deficit in all countries. For the Community, a further condition is a reduction in the monetary tensions which have created enormous problems for the stability of the monetary system. To stimulate some recovery in internal demand, interest rates began to fall slowly in the first part of the year, thanks to a reduction in tension on the foreign exchange markets and to weaker inflationary pressure.

Where price development measured by the implicit GDP deflator is concerned, prices showed a slight inflationary trend over the quarter (+0.8%), while the annual rate continued to fall (+3.0%). This favourable price trend was doubtless influenced by the weakness of domestic demand, as a result of which inflation continued to fall even in countries which had devalued their currency.

With regard to the components of GDP, it should be stressed that the fourth consecutive fall in investment was also the most pronounced (-2.4%). Both private and public consumption also contracted (-0.8% and -0.6% respectively).

In the Member States, the negative trend gained pace in the Netherlands (GDP -0.5%), in France (GDP -0.7%), in Denmark (GDP -1.6%) and especially in Germany (GDP -2.3%). In Italy, the recession which has persisted over the last three quarters seems to be easing (GDP -0.1%). By contrast, the only country showing a positive, albeit modest, upturn is the United Kingdom (GDP +0.4%). As for inflation, the rate fell sharply in Italy (+0.7%) and particularly so in Germany (+0.2%). On the other hand, increases were evident in France (+1.1%), in the United Kingdom and in Denmark (+1.2% and 1.3% respectively), particularly considering that these two Member States had enjoyed quite substantial deflation in the fourth quarter of 1992. In France and the Netherlands, for which preliminary data are available for the second quarter of 1993, production is stagnant (GDP -0.0% and +0.0% respectively).

The United States, for which the data are available for the second quarter of 1993, saw some slight recovery in economic growth (GDP +0.4%) accompanied by a slight dip in both quarterly and annual inflation (+0.6% and +2.5% respectively). Of the components of GDP, investment continues to show a rising trend (+1.7%) and private consumption is recovering (+0.9%).

Japan, for which the data are available for the second quarter of 1993, is still going through a period of uncertainty characterised by a further fall in production (GDP -0.5%), accompanied by a marked rise in quarterly inflation, although the annual rate is down (+0.7%). Of the components of GDP, private consumption (-0.6%) and investment (-0.3%) are falling.

PRICES : EC annual inflation rate down to 3.3% in September

The EC annual inflation rate, as measured by the consumer price index, fell from 3.4% in August (**) to 3.3% in September, which is the lowest rate since May 1988. A year ago this figure was 4.0%.

For the individual Member States the rates over these periods in ascending order of current inflation are as follows:

	SEPT. '93 SEPT. '92	SEPT. '93 SEPT. '92	SEPT. '93 SEPT. '92	SEPT. '93 SEPT. '92	
	SEPT. '93 SEPT. '92	SEPT. '93 SEPT. '92	SEPT. '93 SEPT. '92	SEPT. '93 SEPT. '92	
Denmark	1.2%	2.0%	Luxembourg	3.7%	3.0%
Ireland**	1.3%	2.8%	Germany*	4.0%	3.6%
Netherlands	1.8%	3.5%	Spain	4.3%	5.8%
United Kingdom	1.8%	3.6%	Italy	4.4% ^p	4.8%
France	2.3%	2.1%	Portugal	5.9%	9.3%
Belgium	2.8%	2.3%	Greece	12.8%	15.3%

The above table shows that inflation rates over the last 12 months were lower than those for the corresponding period a year earlier in most of the EC countries. Exceptions were Germany, France, Belgium and Luxembourg, where inflation rates over the last 12 months are slightly higher than a year ago.

The corresponding rates for the USA and Japan are 2.7% (3.0%) and 1.5% (2.0%) respectively.

During the first 9 months of this year the CPI for the Community as a whole rose by 2.7% (September 93 compared with December 1992), whereas inflation during the first 9 months of 1992 was 3.0%.

Between August and September the CPI for EUR 12 rose by 0.3%, thanks to low or moderate price increases in most of the Member States: Germany, Italy and Luxembourg 0.1%; Denmark and Portugal 0.3%; France, the United Kingdom and the Netherlands 0.4%; Spain 0.6%. There was a decrease in the Belgian index (-0.2%), as a result of lower prices for fruit, vegetables and potatoes.

There was a marked increase of 2.5% in the index for Greece caused by sharp rises across nearly all sectors, but mainly for clothing and footwear (8.1%), durable and consumable goods (8.3%) and education and recreation (3.8%).

The quarterly index for Ireland rose by 1.0% between May and August 1993, which corresponds to an average monthly increase of about 0.3%.

* The CPI for the Federal Republic of Germany continues to reflect borders prior to 3 October 1990

** August figures

*** Series for Italy have been revised, which has led to a slight revision of data for EUR 12

p = Provisional

UNEMPLOYMENT IN THE COMMUNITY

Eurostat estimates that the seasonally-adjusted unemployment rate in the European Community for the month of September 1993 was 10.6%, which represents an increase of +0.1% by comparison with the previous month.

During the last three months, the growth in the unemployment rate has slowed down. The increase over the last twelve months, however, remains a considerable one (+1.1 percentage points, from 9.5% to 10.6%).

By comparison with the month of September 1992, the unemployment rate has risen noticeably in almost all the Member States, the exceptions being the United Kingdom and Ireland.

The largest increases in proportional terms have taken place in Spain (+3.1 points, from 18.3% to 21.4%), in Belgium (+1.4 points, from 8.3% to 9.7%), in Germany (+1.3 points, from 4.6% to 5.9% in the old Länder), in Denmark (+1.0 points, from 9.6% to 10.6%) and in France (+0.9 points, from 10.1% to 11.0%). The Community rate for women remains, at 12.2%, unchanged since June 1993, whereas that for men has risen by +0.1 point (from 9.3% to 9.4%). In the last twelve months, the rate for young persons aged under 25 years has risen in Spain by +4.2% (from 32.8% to 37%) and in Belgium by +2.3 points (from 17.5% to 19.8%) while the figure for this category has dropped in Ireland (by -1.5 points, from 28.4% to 26.9%) and in the United Kingdom (by -0.1 points, from 15.3% to 15.2%).

The unemployment rate and the number of unemployed persons are estimated after taking account of the differences between national methods of recording unemployment

The rate of unemployment is estimated by extrapolating the 1991 results of the labour force surveys for all the Member States. The introduction of the 1992 results, when available, will probably lead to a revision of the estimates. The incorporation of the results of the quarterly labour force surveys in the United Kingdom has led to a significant revision of the results published previously (a drop of more than 1 percentage point for the general U.K. unemployment rate).

INDUSTRIAL PRODUCTION Zero growth continues

Production continues to fall in European industry and there is no sign of it bottoming out. This diagnosis applies to all sectors of industrial goods. The Community's construction industry also shows economic weakness.

The rate of change of the industrial production index, adjusted for working days, was -4.5% down for the Community in July 1993 over the corresponding month of the previous year; the figure in June was -4.2%. The corresponding rate of change in July for capital goods was -5.7%.

If one takes the figures for the last three available months, May to July 1993, the rate of change in the seasonally-adjusted production index for EUR 12 was -1.0% compared to that of the three preceding months, February to April.

The recession is even more pronounced in Japan where the corresponding rate of change is -2.4%. There is a levelling off in the USA where the figure is +0.2%.

Hopes of a recovery in the construction industry (NACE 5) were dashed in the Community; the rate of change in the first quarter of 1993 was -6% compared with the last quarter of the previous year, the estimated rate for the second quarter being -1% compared with January to March.

At Member State level, the rates of change for the last three months compared with the previous months are as follows for the seasonally-adjusted industrial production index: Greece +1.1%, Ireland +1.0% (estimated), United Kingdom +0.8% (estimated), Italy -0.1%, Netherlands -0.6%, Belgium -0.6% (estimated), Germany (West) -1.0%, France -1.5% (estimated), Denmark -3.0%. Production thus fell or remained at a low level with slight positive rates of change in most Member States in the summer. Of the larger countries, only the United Kingdom shows signs of an upswing.

Production fell in the following sectors of Community industry: manufacture of metal articles (NACE 31), food, drink and tobacco (NACE 41/42), textile industry (NACE 43) and footwear and clothing (NACE 45). There was a slight recovery in the production of metals (NACE 22), the non-metallic mineral industry (NACE 24) and the motor vehicle industry (NACE 35), though the latter was exclusively due to the rate of change of +6.7 in the United Kingdom (Germany -1.3%, Italy -2.3%, France -2.4%).

BALANCE OF PAYMENTS – world trends – preliminary figures for the first quarter of 1993:

Following the introduction of Intrasat, a new system for collecting statistics on intra-Community trade, there have been major delays in collecting data. Consequently, it has not been possible to update the balance of payments figures for the first quarter of 1993. These figures therefore bear a close resemblance to those published in the previous issue, apart from one or two revisions made by the countries themselves. To date (29 September 1993), we have the figures for the United States, Japan, Denmark, Germany and the United Kingdom, and some of the figures for the Netherlands and Greece. These figures are given for information only. It is impossible to make estimates for the EUR12 total for the first quarter of 1993.

EXTERNAL TRADE

The Community's cumulative external trade deficit in the period January-April 1993 was ECU 14.4 billion, an improvement of ECU 11 billion compared with the same period in 1992.

The difference between the rates of change for exports and imports was close to 7 points for the first four months of 1993. The Community's imports fell by 4.5% between January-April 1992 and January-April 1993, while exports grew slightly (2.4%).

The United States' trade deficit widened by ECU 11.6 billion between the first four months of 1992 and the same period in 1993, to stand at ECU 30.6 billion. Expressed in ecus, both imports and exports (which had shown similar growth rates in the first four months of 1992) grew at different speeds in the period January-April 1993. Imports rose by 15.6% in ecu terms and by 10.3% in dollars, while exports grew more modestly, by 8.3% in ecus and 3.3% in dollars.

Japan's cumulative foreign trade surplus for the period January-April 1993 exceeded ECU 34 billion, as against ECU 26.9 billion for the corresponding period in 1992. Between the two periods, Japanese exports rose by 11.6% in ecus and 6.4% in dollars, but fell by 1% when measured in yen. Japan's import bill rose by 5.1% when measured in ecus, was unchanged in dollar terms and fell by 6% in yen.

Germany's extra-Community trade surplus in the first four months of 1993 was ECU 4.5 billion, ECU 3.3 billion more than in the same period in 1992. Denmark and Italy had extra-Community trade surpluses of ECU 0.7 and

0.6 billion respectively. Italy's performance represents an improvement of ECU 3 billion compared with January-April 1992. Ireland's extra-Community trade was in balance during the first four months of 1993. Portugal posted a deficit of ECU 0.8 billion. Greece and the BLEU were each in deficit to the tune of ECU 1.3 billion. The BLEU's position improved by ECU 1.6 billion compared with the same period in 1992. Spain's extra-Community deficit was close on ECU 2 billion, an improvement of ECU 2.6 billion on the same period in 1992. France's extra-Community trade deficit swelled by ECU 1.6 billion to ECU 2.6 billion. The Netherlands' extra-Community trade deficit improved by ECU 1.3 billion, to stand at nearly ECU 5 billion. The United Kingdom posted the biggest extra-Community deficit, amounting to ECU 7.6 billion, an improvement of ECU 0.4 billion compared with the first four months of 1992.

Note: The intra-Community trade figures for the BLEU, Denmark, Germany, Ireland, the Netherlands, Portugal and the United Kingdom are provisional only and are based on data transmitted by the Member States.

Following the introduction on 1 January 1993 of a new method of collecting trade data, considerable caution should be exercised when comparing the figures for the first quarter of 1992 with those for the first quarter of 1993. The interval between the collection reference dates after 1 January 1993 may have artificially depressed the trade flow data for the first quarter of this year. Intra-Community trade fell by 16.3% when measured as imports but by only 11.3% when measured as exports, a discrepancy which suggests that these figures should be used with care.

In the first quarter of 1993, intra-Community trade as measured by imports declined by 16.3% compared with the same period in 1992, a steeper fall than the 4.8% drop in extra-Community imports. Measured as exports, intra-Community trade was down by 11.3% compared with the first quarter of 1992, whereas extra-Community exports rose by 1.3%.

In the first quarter of 1993, the Netherlands had the biggest intra-Community trade surplus, which, at ECU 5.9 billion, was an improvement of ECU 1.2 billion over the same period the year before. The BLEU, the United Kingdom and Italy posted intra-Community surpluses of between

ECU 1 and 1.5 billion, figures which represent improvements of ECU 2.2, 2.7 and 4 billion respectively compared with January-March 1992. Ireland and Denmark managed intra-Community surpluses of ECU 1 and 0.8 billion respectively, little changed on a year before. France's first-quarter intra-Community trade was in balance, compared with a deficit of ECU 1.2 billion in the first three months of 1992. Germany's trade with the rest of the Community moved into the red, deteriorating by ECU 3.2 billion between the first quarters of 1992 and 1993 to produce a deficit of ECU 0.6 billion. Spain's intra-Community deficit was ECU 0.8 billion, an improvement of nearly ECU 2 billion. Portugal's intra-Community trade in the first quarter of 1993 was in deficit to the tune of ECU 1.4 billion, much the same as a year before. Greece had the biggest first-quarter intra-Community trade deficit, amounting to ECU 2.2 billion, a deterioration of ECU 0.8 billion compared with the first quarter of 1992.

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Elles sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

EUROSTATISTIQUES: en bref

Sauf indications contraires, les données portent sur le territoire de la République fédérale d'Allemagne avant le 3.10.1990, Berlin-Ouest inclus.

TAUX DE CHANGE: Le dollar s'affaiblit avec le dénouement de la crise en Russie

Après le dénouement de la crise en Russie début octobre, le dollar US a recommencé à perdre régulièrement du terrain par rapport au deutsche mark. Le 12 octobre, il était à DM 1,596, c'est-à-dire environ 5 pfennigs plus bas que les plus hauts atteints récemment dans la dernière semaine de septembre.

La récente fermeté du deutsche mark contre le dollar a eu pour effet de trop le raffermir contre les autres monnaies du mécanisme des taux de change (MTC). Il a monté au-dessus de FF 3,50 après s'être échangé dix jours plus tôt au-dessous de ce seuil, et il s'est également apprécier contre le franc belge et la livre irlandaise.

La lire italienne et le sterling qui ont quitté le MTC il y a exactement un an, ont été dans un cas comme dans l'autre franchement faibles contre le mark. Actuellement, le sterling se tient à ses niveaux du début de juin après s'être traité au-dessus de DM 2,50 pendant la majeure partie de l'été, tandis que la lire s'est constamment dépréciée contre le DM depuis la fin de juin, passant d'environ Lit 900 pour un mark à près de Lit 1 000 actuellement. Pour sa part, la couronne danoise a été stable contre le DM et s'est même légèrement appréciée. La Banque centrale du Danemark a réduit ses taux d'intérêt directeurs le 24 septembre de 0,5 %, puis le 11 octobre du même pourcentage sans dépréciation réelle de la couronne. Le taux d'escompte se situe actuellement à 7,75 %, légèrement au-dessus des niveaux en vigueur avant les pressions de l'été sur le taux de change.

Le dollar US a maintenu sa position contre le yen japonais et à la mi-octobre, il se traitait toujours aux environs de Yen 105.

RENDEMENTS DES OBLIGATIONS D'ÉTAT: les rendements baissent en Espagne et en Irlande

Le peu de données disponibles ce mois indiquent une baisse persistante du rendement des obligations d'État espagnoles au-dessous de 9 % en septembre. En octobre 1992, le rendement était de 13,6 %. Bien que le taux d'inflation espagnol ait légèrement baissé récemment, il est clair que le niveau réel (ajusté de l'inflation) des taux d'intérêt à long terme en Espagne ont fortement chuté.

Les rendements ont également perdu du terrain en Irlande où en août, ils étaient à 7,2 %, revenant de 7,7 % en juillet. Au RU, les rendements ont également chuté en septembre. Cependant en Belgique, le rendement des obligations d'État s'est légèrement amélioré en septembre, première hausse mensuelle depuis février de cette année. Il faut toutefois noter que les taux d'intérêt à court terme en Belgique sont restés nettement plus élevés que précédemment dans l'année.

Sur une période d'un mois, les rendements n'ont pas varié en septembre au Danemark et au Luxembourg: aux alentours de 6,6 % dans les deux pays.

MASSE MONÉTAIRE: En France, la croissance de M3 demeure au-dessous de la fourchette fixée

Le taux de croissance de M3 en France a été inférieur à 1 % au cours des douze mois se terminant en juillet, c'est-à-dire bien en-dessous de la fourchette de croissance de 4-6,5 % prévue pour 1993. C'est le quatrième mois consécutif de ralentissement de la croissance, bien que le glissement de juillet était en partie du à une ponction de fonds sur les dépôts à court terme inclus ensuite dans les agrégats monétaires pour l'achat de l'emprunt «Balladur».

En revanche, la croissance monétaire en Italie continue de s'accélérer: la croissance de M2 au cours des douze mois se terminant en août a été de 7,8 %, c'est-à-dire au-dessus de la limite supérieure de la fourchette de 5-7 %.

La croissance de M2 aux États-Unis continue de se ralentir, mais était au-dessus de 1 % en juin pour le deuxième mois consécutif.

RÉSERVES OFFICIELLES SUR L'ÉTRANGER: fortes rentrées en Allemagne et aux Pays-Bas en août

Les réserves de l'Allemagne et des Pays-Bas se sont accrues respectivement de 34 et 15 % au cours du mois d'août à la suite de l'intervention sur le marché des changes entreprise par les banques centrales des deux pays à la fin juillet au moment où d'autres monnaies du MTC étaient attaquées. Les réserves de l'Allemagne s'élèvent maintenant à plus de 90 milliards d'Eufs, c'est-à-dire au-dessus du précédent record de septembre 1992.

Le revers de la médaille montre des sorties de réserves d'autres pays, en particulier du Danemark, qui a perdu 21 % de ses réserves en août après un accroissement en juillet. La Belgique, l'Espagne et l'Irlande ont aussi supporté des sorties de réserves, bien que dans le cas de l'Irlande, les réserves sont deux fois plus importantes qu'au début de l'année puisqu'elles se sont accrues régulièrement jusqu'à la fin de juillet.

Le Japon a bénéficié de rentrées de réserves en juillet; ses réserves dépassent aujourd'hui 85 milliards d'Eufs, leur plus haut niveau depuis mai 1989, et une hausse de près de 43 % depuis le début de 1993. Cette situation est due à la fermeté du yen japonais: la banque du Japon est intervenue pour maintenir le taux de change yen-dollar qui s'est approché des Yen 100 à la mi-août.

COMPTES TRIMESTRIELS: Au cours du premier trimestre 1993: fléchissement de la croissance économique (PIB -0,9 %); reprise de l'inflation (+0,8 %)

Le premier trimestre 1993 a été caractérisé, pour l'économie communautaire dans son ensemble, par un nouveau fléchissement de la croissance économique (PIB -0,9 %). Ce résultat, d'ailleurs en ligne avec les prévisions macro-économiques pour l'année 1993, indique comment au cours de l'année la situation économique devrait se présenter avec des caractéristiques encore moins favorables qu'en 1992. Selon la plupart des économistes, il est très difficile d'identifier des signaux de reprise à court terme pour l'économie communautaire. D'autre part, des signaux de reprise, même si assez faibles et parfois contradictoires viennent de l'économie américaine. La vraie inconnue de cette phase est représentée par la capacité des économies communautaires, étant donné leurs problèmes internes, de profiter de cette nouvelle phase économique aux Etats-Unis. Comme souligné dans la dernière réunion du G7 la reprise de l'économie mondiale est liée à trois facteurs principaux : la reprise du commerce extérieur strictement liée au développement positif des négociés GATT; la reprise de la demande interne, surtout des biens de consommation finale; la réduction du déficit primaire public dans tous les pays. A ces conditions il faut rajouter,

pour la Communauté, une réduction des tensions monétaires qui ont créé des gros problèmes à la stabilité du système monétaire. Dans le but de favoriser une certaine reprise de la demande interne, dans la première partie de l'année en cours, grâce d'un côté à une réduction de tension sur le marché des changes, et de l'autre côté à une plus faible pression inflationniste, les taux d'intérêt ont commencé lentement à descendre.

En ce qui concerne l'évolution des prix, mesurée par le déflateur implicite du PIB, on enregistre une légère reprise de l'inflation en rythme trimestriel (+0,8 %), tandis qu'en rythme annuel on constate la poursuite de la baisse (+3,0 %). Cette évolution favorable des prix a été sans doute influencée par la faiblesse de la demande interne grâce à laquelle, même dans les pays où il y a eu une dévaluation des devises, l'inflation a continué à baïsser.

En ce qui concerne les composantes du PIB, il faut souligner le quatrième fléchissement consécutif des investissements qui d'ailleurs est le plus remarquable (-2,4 %). La consommation, tant privée que publique, présente aussi une évolution négative (-0,8 % et -0,6 % respectivement).

En ce qui concerne la situation dans les Etats membres, on constate une accentuation de la phase négative aux Pays-Bas (PIB -0,5 %), en France (PIB -0,7 %), au Danemark (PIB -1,6 %) et surtout en Allemagne (PIB 2,3 %). En Italie la phase de récession qui continue depuis trois trimestres semble ralentir (PIB -0,1 %). Par contre le seul pays où l'on constate une évolution positive, même avec un rythme modéré, est le Royaume-Uni (PIB +0,4 %). En ce qui concerne l'inflation, on constate une sensible réduction en Italie (+0,7 %) et surtout en Allemagne (+0,2 %). Par contre une reprise se vérifie en France (+1,1 %) ainsi qu'au Royaume-Uni et au Danemark (+1,2 % et +1,3 % respectivement) surtout si l'on considère qu'au cours du quatrième trimestre 1992 dans ces deux Etats membres on avait enregistré une déflation assez importante. Pour la France et les Pays-Bas, dont on dispose des données préliminaires pour le deuxième trimestre 1993, on observe une stagnation de la production (PIB -0,0 % et +0,0 % respectivement).

Aux Etats-Unis, dont on dispose des données pour le deuxième trimestre 1993, on constate une légère reprise de la croissance économique (PIB +0,4 %) accompagnée par une légère baisse de l'inflation, tant en rythme trimestriel qu'annuel (+0,6 % et +2,5 % respectivement). Parmi les composantes du PIB, on constate la poursuite de l'évolution positive des investissements (+1,7 %) ainsi que la reprise de la consommation privée (+0,9 %).

Pour le Japon, dont on dispose des données pour le deuxième trimestre 1993, on constate la poursuite de la phase d'incertitude caractérisée par une nouvelle baisse de la production (PIB -0,5 %) accompagnée par une considérable reprise de l'inflation trimestrielle, tandis qu'en rythme annuel on observe une réduction (+0,7 %). Parmi les composantes du PIB, on constate le fléchissement de la consommation privée (-0,6 %) et des investissements (-0,3 %).

PRIX : Le taux d'inflation annuelle de la CE descend à 3,3 % en septembre

Le taux d'inflation annuelle de la CE, mesuré par l'indice des prix à la consommation, est descendu de 3,4 % en août (**) à 3,3 % en septembre, ce qui est le taux le plus bas depuis mai 1988. Il y a un an ce chiffre était de 4,0 %.

Dans l'ordre croissant de l'inflation actuelle les taux des Etats membres pour ces périodes sont les suivants:

	SEPT. '93	SEPT. '92	SEPT. '93	SEPT. '92	SEPT. '93	SEPT. '92	SEPT. '93	SEPT. '92
	Sept. '92	Sept. '91	Sept. '92	Sept. '91	Sept. '92	Sept. '91	Sept. '92	Sept. '91
Danemark	1,2 %	2,0 %	Luxembourg	3,7 %	3,0 %			
Irlande**	1,3 %	2,8 %	R.F.D'Allemagne*	4,0 %	3,6 %			
Pays-Bas	1,8 %	3,5 %	Espagne	4,3 %	5,8 %			
Royaume-Uni	1,8 %	3,6 %	Italie	4,4 %p	4,8 %			
France	2,3 %	2,1 %	Portugal	5,9 %	9,3 %			
Belgique	2,8 %	2,3 %	Grèce	12,8 %	15,3 %			

Le tableau ci-dessus montre que les taux d'inflation pendant les 12 derniers mois ont été inférieurs à ceux de la période correspondante de 1992 dans la plupart des pays de la CE.

Font exception l'Allemagne, la France, la Belgique et le Luxembourg où l'inflation pendant les 12 derniers mois a été légèrement plus élevée que celle d'il y a un an.

Les taux correspondants pour les Etats-Unis et le Japon sont respectivement de 2,7 % et de 1,5 %.

Pendant les 9 premiers mois de cette année l'IPC pour l'ensemble de la Communauté a progressé de 2,7 % (septembre 1993 par rapport à décembre 1992), tandis que l'inflation pendant la période correspondante de 1992 a été de 3,0 %

Entre août et septembre l'IPC pour EUR 12 a augmenté de 0,3 % grâce à des accroissements faibles ou modérés dans la majorité des Etats membres: Allemagne, Italie et Luxembourg 0,1 %, Danemark et Portugal 0,3 %, France, Royaume-Uni et Pays-Bas 0,4 %, Espagne 0,6 %. L'indice belge a reculé de 0,2 % grâce à des réductions des prix des fruits, des légumes et des pommes de terre.

L'indice de la Grèce connu une augmentation sensible de 2,5 % causée par de fortes hausses dans tous les secteurs, mais principalement dans ceux de l'habillement et des chaussures (8,1 %), des biens de consommation durables (8,3 %) et de l'éducation et des loisirs (3,8 %).

L'indice trimestriel pour l'Irlande a progressé de 1,0 % entre mi-mai et mi-août 1993, ce qui correspond à une hausse d'environ 0,3 % en moyenne mensuelle.

* L'IPC pour la R.F. D'Allemagne continue à se rapporter à la situation territoriale avant le 3 octobre 1990

** Chiffres pour août

*** Les séries de l'Italie ont été révisées, ce qui a engendré une légère révision des données pour EUR 12

p = Provisoire

LE CHÔMAGE DANS LA COMMUNAUTÉ

Eurostat estime que, dans la Communauté européenne, le taux de chômage corrigé des variations saisonnières atteint 10,6 % au mois de septembre 1993, une augmentation de +0,1 point de pourcentage par rapport au mois précédent.

Au cours des trois mois de l'été, la croissance du taux de chômage communautaire a marqué une pause. Cependant, en douze mois, l'augmentation reste considérable (+1,1 point de pourcentage, de 9,5 % à 10,6 %).

FR

Par rapport au mois de septembre 1992, le taux de chômage a nettement augmenté dans presque tous les Etats Membres, à la notable exception du Royaume-Uni et de l'Irlande. Les hausses proportionnellement les plus importantes se sont produites en Espagne (+3,1 points, de 18,3 % à 21,4 %), en Belgique (+1,4 points, de 8,3 % à 9,7 %), en Allemagne (+1,3 points, de 4,6 % à 5,9 % dans les anciens Länder), au Danemark (+1,0 points, de 9,6 % à 10,6 %) et en France (+0,9 points, de 10,1 % à 11,0 %). Le taux de chômage communautaire des femmes est resté inchangé depuis le mois de juin 1993 (12,2 %), tandis que celui des hommes a augmenté de +0,1 point (de 9,3 % à 9,4 %). En douze mois, en Espagne, la croissance du taux de chômage chez les jeunes de moins de 25 ans a augmenté de +4,2 points (de 32,8 % à 37,0 %) et en Belgique de +2,3 points (de 17,5 % à 19,8 %) alors qu'en Irlande ce taux de chômage a diminué (de -1,5 points, de 28,4 % à 26,9 %) et au Royaume-Uni (de -0,1 points, de 15,3 % à 15,2 %).

Le taux de chômage et le nombre de chômeurs sont estimés après correction des différences dans les méthodes nationales de recensement du chômage. Le taux de chômage est estimé en extrapolant les résultats 1991 des enquêtes sur les forces de travail pour tous les Etats membres. L'introduction des résultats de l'année 1992, dès qu'ils seront disponibles, entraînera probablement une révision des estimations. La prise en compte des résultats des enquêtes trimestrielles sur les forces de travail au Royaume Uni a provoqué une révision significative des résultats publiés précédemment (baisse de plus de 1 point de pourcentage pour le taux de chômage global).

PRODUCTION INDUSTRIELLE – La traversée du désert se poursuit

Dans le secteur industriel européen, la production continue de baisser et aucune stabilisation n'est en vue, ce diagnostic valant pour tous les secteurs de la production de biens. Dans le secteur de la construction de la Communauté, la conjoncture reste faible elle aussi.

Pour la Communauté européenne [EUR12], le taux de variation de l'indice de la production industrielle corrigé du nombre de jours ouvrables par rapport à la valeur du mois correspondant de l'année précédente a été de -4,5 % en juillet 1993, de -4,2 % en juin. Pour l'industrie des biens d'investissement, le taux de variation correspondant est de -5,7 % en juillet.

Si l'on considère les chiffres des trois derniers mois disponibles (mai, juin, juillet 1993), on constate que pour EUR12, le taux de variation de l'indice de production corrigé des variations saisonnières est de -1,0 % par rapport aux trois mois précédents (février, mars, avril).

Au Japon, la récession a été encore plus forte et le taux de variation correspondant est de -2,4 %. Aux Etats-Unis, avec +0,2 %, c'est plutôt la stagnation.

au sein de la Communauté européenne, dans le secteur de la construction [NACE 5], les espoirs de reprise ne se sont pas confirmés: au premier trimestre 1993, le taux de variation a été de -6 % par rapport au dernier trimestre de l'année précédente et au deuxième trimestre, il a été [taux estimé] de -1 % par rapport aux trois mois précédents (janvier, février, mars).

Dans les différents Etats membres de la Communauté européenne, les taux de variation corrigés des variations saisonnières de la production industrielle des trois derniers mois par rapport aux mois précédents sont les suivants: Grèce +1,1 %, Irlande +1,0 % [estimation], Royaume-Uni +0,8 %, Italie -0,1 %, Pays-Bas -0,6 %, Belgique -0,6 % [estimation], Allemagne [Ouest] -1,0 %, France -1,5 % [estimation], Danemark -3,0 % [estimation]. On constate donc que dans de nombreux Etats membres, la production a également baissé au cours des mois d'été ou a stagné, avec de faibles taux de variation positifs. Parmi les grands Etats membres de la Communauté, seul le Royaume-Uni enregistre des signes de reprise.

Dans les différentes branches économiques de l'industrie de la Communauté, la production a baissé dans le secteur des ouvrages en métaux [NACE 31], dans l'industrie des produits alimentaires [NACE 41/42], dans l'industrie textile [NACE 43] et dans l'industrie de la chaussure et de l'habillement [NACE 45]. On enregistre une légère reprise dans la production de métaux [NACE 22], l'industrie des produits minéraux non métalliques [NACE 24] et dans la construction automobile [NACE 35], la progression dans ce dernier secteur étant d'ailleurs due uniquement au taux de variation de +6,7 % au Royaume-Uni [Allemagne -1,3 %, Italie -2,3 %, France -2,4 %].

BALANCE DES PAIEMENTS – tendances mondiales – chiffres préliminaires pour le premier trimestre de 1993:

Suite à la mise en place d'Intrasat, nouveau système de collecte des statistiques des échanges de biens intra-communautaires, des retards importants sont apparus dans la

collecte des données. En conséquence, les chiffres de la balance des paiements n'ont pas pu être mis à jour pour le premier trimestre 1993.

Ces chiffres sont donc semblables à ceux publiés dans le précédent numéro exceptées quelques révisions effectuées par les pays eux-mêmes. A ce jour, 29 septembre 1993, nous disposons des chiffres des Etats-Unis, du Japon, du Danemark, de l'Allemagne, du Royaume-Uni et partiellement des Pays-bas et de la Grèce. Ces chiffres sont donnés à titre d'information. Il est impossible d'établir des estimations concernant le total Europe-12 pour le premier trimestre de 1993.

COMMERCE EXTERIEUR

Le déficit des échanges communautaires cumulé de janvier à avril 1993 atteint 14,4 Mrds d'écus, il s'améliore de 11 Mrds par rapport à la même période de 1992. L'écart entre taux d'évolution des exportations et des importations approche 7 points en janvier-avril 1993. Les importations extra-communautaires s'infléchissent de 4,5 % entre janvier-avril 1992 et 1993, tandis que les exportations progressent légèrement (2,4 %). Le bilan commercial des Etats-Unis se creuse de 11,6 Mrds d'écus de janvier-avril 1992 à 1993, où il s'affiche à -30,6 Mrds d'écus. Les importations et les exportations des Etats-Unis, exprimées en écus, qui progressent à des rythmes semblables aux premiers quatre mois de 1992, connaissent des évolutions différencier pour la période correspondante de 1993. Les importations croissent de 15,6 % en écus, et de 10,3 % en dollars. Les exportations connaissent une évolution plus contenue: 8,3 % en écus et 3,3 % en dollars.

L'excédent des échanges japonais cumulé de janvier à avril 1993 dépasse 34 Mrds d'écus, contre 26,9 Mrds pour la période correspondante de 1992. Les exportations du Japon progressent de 11,6 % en écus, de 6,4 % en dollars, mais s'infléchissent de 1 % en yens entre janvier-avril 1992 et 1993. Les importations du Japon sont en augmentation de 5,1 % en yens, elles stagnent en terme de dollars, et affichent une baisse de 6 % en yens.

Pour les quatre premiers mois de 1993 l'Allemagne dégage un excédent commercial extra-communautaire de 4,5 Mrds d'écus, supérieur à 3,3 Mrds à celui de la période correspondante de 1992. Le Danemark et l'Italie sont excédentaires de 0,7 Mrd d'écus et 0,6 Mrd. Le solde italien se redresse de 3 Mrds d'écus par rapport à janvier-avril 1992. Les échanges extra de l'Irlande sont équilibrés pour les quatre premiers mois de 1993. Le Portugal affiche pour cette période un déficit de 0,8 Mrd d'écus. La Grèce et l'UEBL sont déficitaires chacune de 1,3 Mrd d'écus. L'UEBL voit son bilan s'améliorer de 1,6 Mrd d'écus entre janvier-avril 1992 et 1993. L'Espagne affiche un déficit extra proche de 2 Mrds d'écus, allégé de 2,6 Mrds par rapport à janvier-avril 1992. Le déficit français atteint 2,6 Mrds d'écus, et se creuse de 1,6 Mrd. Les Pays-Bas voient leur solde extra s'améliorer de 1,3 Mrd d'écus, ce dernier reste déficitaire de près de 5 Mrds d'écus. Le déficit commercial extra-communautaire du Royaume-Uni est le plus lourd: -7,6 Mrds d'écus, il s'allège de 0,4 Mrd entre les quatre premiers mois de 1992 et de 1993.

Attention: les résultats du commerce intra-communautaire de l'UEBL, du Danemark, de l'Allemagne, de l'Irlande, des Pays-Bas, du Portugal, et du Royaume-Uni sont des chiffres provisoires, basés sur des données transmises par les Etats-Membres.

Suite au changement de collecte au premier janvier 1993, les comparaisons entre premier trimestre 1992 et 1993 sont à effectuer avec prudence. Le décalage des dates de référence à la collecte après le premier janvier 1993 peut induire une baisse des flux au premier trimestre 1993. L'évolution du commerce intra-communautaire mesuré par les arrivées (-16,3 %) diffère de celle appréhendée par les expéditions (-11,3 %), ce qui invite à la circonspection.

Au premier trimestre 1993 le commerce intra-communautaire (mesuré par les arrivées) s'infléchit de 16,3 % par rapport à son niveau du premier trimestre 1992, plus nettement que les importations extra-communautaires qui enregistrent une baisse de 4,8 %. Les expéditions seraient en baisse de 11,3 % par rapport au premier trimestre 1992, tandis que les exportations extra progressent de 1,3 %.

Au premier trimestre 1993 le solde du commerce intra des Pays-Bas est le plus élevé: 5,9 Mrds d'écus, en progrès de 1,2 Mrd par rapport au premier trimestre 1992. L'UEBL, le Royaume-Uni, et l'Italie ont des bilans intra compris entre un milliard et un milliard et demi d'écus. Ces trois soldes sont en progrès respectifs de 2,2 Mrds d'écus, 2,7 Mrds, et 4 Mrds par rapport à janvier-mars 1992. L'Irlande et le Danemark sont excédentaires pour le commerce intra du premier trimestre 1993 (respectivement 1 Mrd d'écus, et 0,8 Mrd d'écus). Les bilans de ces deux pays diffèrent peu de ceux du premier trimestre 1992. La France a des échanges intra équilibrés au premier trimestre 1993, alors qu'ils sont déficitaires de 1,2 Mrd d'écus en janvier-mars 1992. Le solde intra-communautaire de l'Allemagne se dégrade de 3,2 Mrds d'écus, et atteint -0,6 Mrd d'écus au premier trimestre 1993. Le bilan intra de l'Espagne est déficitaire de 0,8 Mrd d'écus, il s'améliore de près de 2 Mrds d'écus. Les échanges intra du Portugal affichent un solde négatif au premier trimestre 1993 (-1,4 Mrd d'écus) qui reste proche de celui du premier trimestre 1992. La Grèce enregistre le déficit le plus lourd pour le premier trimestre 1993: -2,2 Mrds d'écus, ce dernier se dégrade de 0,8 Mrd d'écus.

„On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Kode gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.

Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeföhrten Tabelle zu entnehmen.

Land XX	Sektor XX	Tabelle XXXX	Periodizität und Einheit X
06 EUR 12*			0 jährlich, Angaben in Prozent
03 EUR 10			1 vierteljährlich, Angaben in Prozent
11 D*			2 monatlich, Angaben in Prozent
14 F			3 jährlich, Indexangaben (1985 = 100)
16 I			4 vierteljährlich, Indexangaben (1985 = 100)
18 NL			5 monatlich, Indexangaben (1985 = 100)
21 UEBL			6 jährlich, Angaben in absoluten Werten
22 B			7 vierteljährlich, Angaben in absoluten Werten
24 L			8 monatlich, Angaben in absoluten Werten
26 UK			9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100
28 IRL			
30 DK			
32 E			
34 GR			
36 P			
42 USA			
46 JAP			

* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Kode 14 93 0304 8 einzugeben.

‘On-line’ consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

Country XX	Sector XX	Table XXXX	Periodicity and unit X
06 EUR 12*			0 annual 1 quarterly 2 monthly 3 annual 4 quarterly 5 monthly 6 annual 7 quarterly 8 monthly 9 weighting
03 EUR 10			in % in % in % index 1985 = 100 index 1985 = 100 index 1985 = 100 absolute value absolute value absolute value EUR 10 = 100 or EUR 12 = 100
11 D*			
14 F			
16 I			
18 NL			
21 UEBL			
22 B			
24 L			
26 UK			
28 IRL			
30 DK			
32 E			
34 GR			
36 P			
42 USA			
46 JAP			

* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'*Eurostatistiques*, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

Pays XX	Secteur XX	Tableau XXXX	Périodicité et unité X
06 EUR 12*			0 annuelle 1 trimestrielle 2 mensuelle 3 annuelle 4 trimestrielle 5 mensuelle 6 annuelle 7 trimestrielle 8 mensuelle 9 pondération
03 EUR 10			exprimée en pourcentage exprimée en pourcentage exprimée en pourcentage exprimée en indice 1985 = 100 exprimée en indice 1985 = 100 exprimée en indice 1985 = 100 exprimée en valeur absolue exprimée en valeur absolue exprimée en valeur absolue EUR 10 = 100 ou EUR 12 = 100
11 D*			
14 F			
16 I			
18 NL			
21 UEBL			
22 B			
24 L			
26 UK			
28 IRL			
30 DK			
32 E			
34 GR			
36 P			
42 USA			
46 JAP			

* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
