

# Farm structure in Norway – 2005

## One-third of the holdings have a gainful activity other than agriculture

*This Statistics in Focus is part of a series of country-specific publications on the results of the Farm Structure Survey (FSS) 2005. It provides a brief but nevertheless comprehensive insight into the farm structure in Norway. A similar publication was issued in September 2005 presenting the results of the FSS 2003 in Norway.*

\* \* \*

In summer 2005 in Norway, about 52.8 thousand\* agricultural holdings had an economic size of at least 1 European Size Unit (ESU).

- These holdings employed 58.8 thousand AWUs (annual work units), the equivalent of 58.8 thousand persons working full time;
- they made use of about 1 million ha of agricultural area, which is on average 19.6 ha per holding (compared to 17.9 ha in 2003).

Among these 52.8 thousand agricultural holdings

- 48% made use of less than one AWU, while 12% made use of 2 or more AWUs;
- 12% used less than 5 ha agricultural area, while 5% used 50 ha or more;
- 27% were holdings of specialist dairy farming, 24% engaged in various grazing livestock including sheep, 18% were specialist cereals, oil seed and protein crops, 7% had specialised in cattle rearing and fattening and 6% were the type general field cropping;
- 4% were organic farms.

Among the 52.6 thousand sole holders and main holders of group holdings

- 13% were women;
- 34% were aged 55 or more, and 9% were younger than 35 years;
- 42% had another gainful activity as their major occupation.

## Contents

Table 1 – Labour force by size of the farms.....3

Table 2 – Agricultural holdings by size.....4

Table 3 – Land use by size of the farms.....5

Table 4 – Livestock by size of the farms.....6

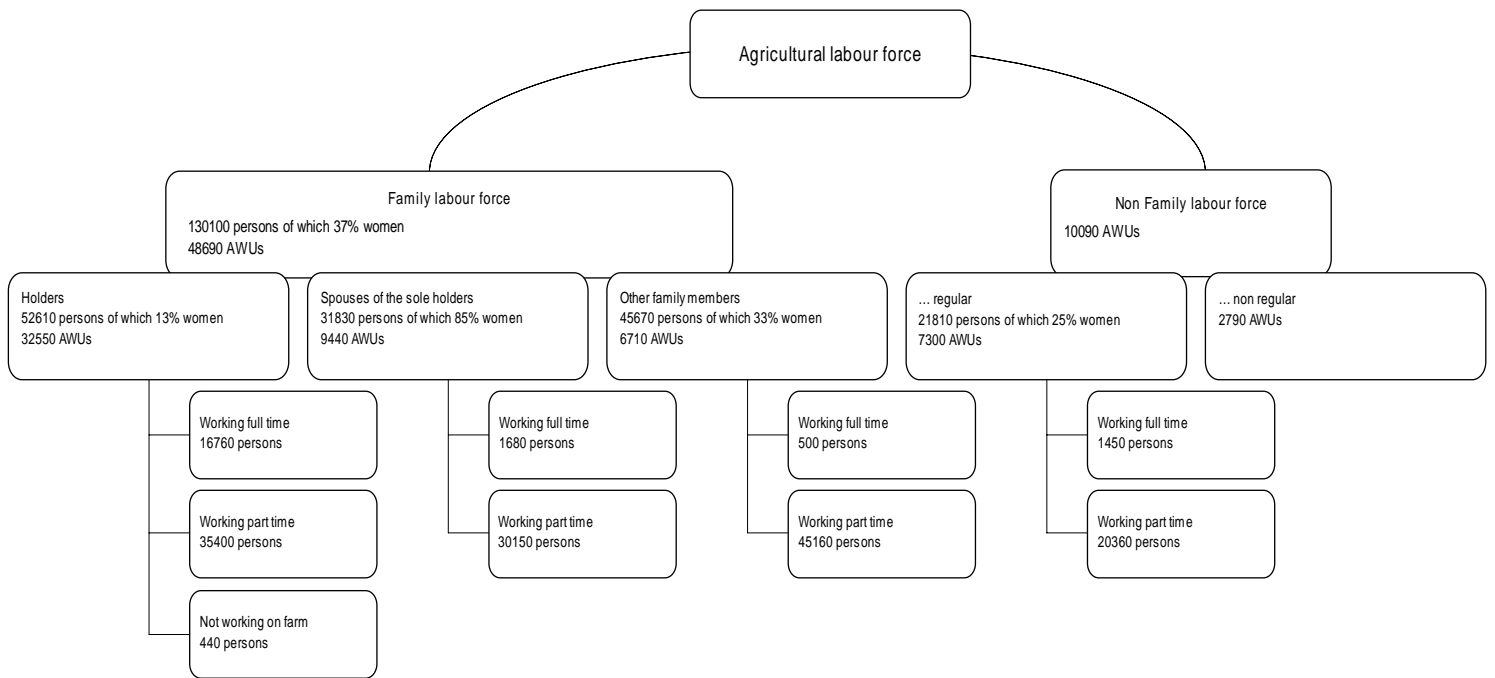

Table 5 – Subsistence farming.7

\* Due to differences in the threshold across Member States, the total number of farms is not comparable between countries. This is why the present analysis, including Tables 1-4 and the graphs focus on holdings of at least one ESU. See methodological notes for more information on the concept of the ESU.

# Norway 2005 – Holdings of at least 1 ESU

## ► METHODOLOGICAL NOTES

The survey on the structure of agricultural holdings in Norway was carried out in June/July 2005 on a sample basis; however information on crop production, livestock and farming practices (organic farming) was gained from registers on an exhaustive basis. The last full-scale agricultural census was conducted in 1999. The reference period of the farm structure survey for UAA, crops and livestock (excluding sheep) was 31 July 2005, for labour force characteristics the 12 months prior to 1 June 2005, and for sheep and other information (non-agricultural activity, irrigation, etc) 1 June 2005.

The target population was all active farms having at least 0.5 ha UAA or, if less UAA, livestock and/or cultivate horticultural crops exceeding certain thresholds (300 m<sup>2</sup> greenhouse, 0.2 ha open field vegetables, 0.1 ha orchards, berry-plantations or nurseries, 10 bovines, 25 sheep or 10 goats over 1 year old, 5 breeding pigs and/or 200 other pigs, 1000 laying hens or pullets, 5000 broilers). For the purpose of the FSS 2005 the sample of FSS 2003 was updated. Stratification was done by 18 counties, 6 UAA size classes and 8 types of farming. The result was assessed and supplementary sampling was done. Before the estimation of the results the sample frame was updated and post-stratified with actual survey data. Finally about 11 thousand holdings were in the sample, which means a 20.4% sample size.

For each activity ('enterprise') on a farm (for instance wheat, dairy cow or vineyard), a standard gross margin (SGM) is estimated, based on the area (or the number of heads) and a regional coefficient. The sum of such margins in a farm is its economic size, expressed in European Size Units (ESU). 1 ESU is equal to 1200 euros.

Each farm is classified in the community typology by its economic size and its type of farming, depending on the share of each enterprise in its economic size. For instance, a farm where breeding sows account for more than 2/3 of the economic size, is classified as

*specialist pig rearing* (type 5011). Depending on the level of aggregation, farms are grouped into 8 to 70 types.

Annual work unit (AWU) is equivalent to a worker employed on a full time basis for one year. In Norway it is 1845 hours (230.6 working days of 8 working hours per day).

Livestock Unit (LU) is equivalent to a dairy cow. The number of animals (number of heads) is converted into LU using a set of coefficients reflecting the feed requirements of the different animal categories.

Subsistence farming refers here to all farms below 1 ESU economic size. Note that the number of farms cannot be compared between countries due to the differences in coverage of FSS.

European Statistical Data Support:

Eurostat set up with the members of the 'European statistical system' a network of support centres, which will exist in nearly all Member States as well as in some EFTA countries.

Their mission is to provide help and guidance to Internet users of European statistical data.

Contact details for this support network can be found on our Internet site: <http://ec.europa.eu/eurostat/>
