COMMISSION OIL BULLETIN N° 181

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored ; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.34.50.)

COMMISSION OIL BULLETIN N° 182

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored ; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.34.50.)

**Weekly summary :** Evolution (in %) of Community indications for :

1°) Weighted average pre-tax prices for principal oil products at 31.1.1983 (Table 2). compared with 15.12.78 compared with previous week	<hr/> 80% <hr/> + 0,13 % <hr/>
2°) Weighted average CIF cost of crude oil supplies in October 1982 (Table 3). compared with 15.12.78	<hr/> + 142,10 % <hr/>

The CIF supply price is derived from mensual declarations by Member States (see Oil Bulletin 177 for methodology).

COMMISSION OIL BULLETIN No. 184

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.34.50.)

**Weekly summary :** Evolution (in %) of Community indications for :

1 <sup>o</sup> ) Weighted average pre-tax prices for principal oil products at 14.2.83 (Table 2) compared with 15.12.78 compared with previous week	<hr/> +79% <hr/> +1,16% <hr/>
2 <sup>o</sup> ) Weighted average CIF <sup>(1)</sup> cost of crude oil supplies in October 1982 (Table 3) compared with 15.12.78	<hr/> +142,10% <hr/>

(1) The CIF supply price is derived from monthly declaration by Member States (see Oil Bulletin 177 for methodology).

COMMISSION OIL BULLETIN n° 187

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.34.50.)

COMMISSION OIL BULLETIN N° 188

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.34.50.)

The Commission Oil Bulletin indicates :

1. Each week

- a) the indicative level of the most representative pre-tax consumer prices in each Member state and for the Community as a whole, for the following principal oil products and consumer types :
- premium and regular gasolines and automotive gasoil, at the pump;
  - heating gasoil, for deliveries of 2000 to 5000 litres;
  - residual fuel oil (maximum sulphur content) delivered prices for (small) consumers with offtakes of less than 2000 metric tons per month or less than 24.000 metric tons per year.

These price levels are indicated in national currencies (Table 1) and in current dollars (Table 2). In the latter case, the bulletin also indicated for the Community as a whole, the percentage change from mid December 1978 in the price of each product, and in the average for all the products considered weighted according to their consumption during a given period.

- b) the cif cost level of Community crude oil supplies, calculated at the date of landing (Table 3). This is a weighted average which includes Community produced crude oils consumed within the producing member state and based on the actual structure of Community supply and the prices actually paid for the crude oils concerned (i.e. including both rebates and premia). Data for this calculation are obtained in the main, from the monthly declarations made under the Community system for the registration of crude oil imports.

2. Each Month

Average ruling prices (and the taxes and duties applicable) in national currency for principal oil products in each member state as at the 15th of the previous month (Table 4). For the same date, this table also shows the rates of exchange against the dollar and the European Unit of Account to facilitate comparison, if desired, between Member states.

3. Each Quarter

The level in current dollars, and the indexed evolution since the first quarter of 1977 (Fourth quarter 1978 = 100), of the average CIF price of crude oil supply for each Member state and for the Community as a whole.

These average CIF prices, obtained through application of a 1976 Council Directive and a Commission implementing decision of 1977 on price transparency, are derived from oil company declarations received by the Commission via Member states; these data cover at least 85 % of crude oil imports and include local crude production. Average quarterly costs for each type of crude are weighted by the quantities actually supplied using the official market rates of exchange to obtain the most representative supply cost indications.

Finally table 6 shows, by Member Country and for the Community, the imported supply cost of the main petroleum products. This cost figure is also available in accordance with the requirements of Community documents on the transparency of the prices mentioned above.

**COMMISSION OIL BULLETIN N° 190**

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored ; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.34.50.)

COMMISSION OIL BULLETIN NO.193

4417.4/1

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

COMMISSION OIL BULLETIN NO.195

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

Weekly summary :

Evolution (in %) of Community indications for :

1<sup>o</sup>) Weighted average pre-tax prices  
for principal oil products at 16.5.83 (Table 2)

compared with 15.12.1978

+70%

compared with previous week

2<sup>o</sup>) Weighted average CIF cost of crude  
oil supplies for January 1983 (Table 3)

compared with 15.12.1978

+ 139,07%

(1) The CIF supply cost is derived from monthly declarations by Member States (see Oil Bulletin 189 for methodology).

COMMISSION OIL BULLETIN NO. 198

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

Weekly summary :

Evolution (in %) of Community indications for :

1°) Weighted average pre-tax prices for principal oil products at 06.06.83 (Table 2)	
compared with 15.12.1978	+ 64%
compared with previous week	- 1,86%
2°) Weighted average CIF cost of crude oil supplies for February 1983 (Table 3)	
compared with 15.12.1978	+134,17%

(1) The CIF supply cost is derived from monthly declarations by Member States (see Oil Bulletin 189 for methodology).

Niveaux indicatifs hebdomadaires des prix hors taxes à la consommation en monnaies nationales  
Weekly indicative consumer price levels in national currencies . Tax and duties excluded (1)
